*WebSphere Application Server V8.5 Administration and Configuration Guide for the Full Profile* Fabio Albertoni, Tanja Baumann, Yogesh Bhatia, Eduardo Fronza, Marcio da Ros Gomes, Sebastian Kapciak, Catalin Mierlea, Sergio Pinto, Anoop Ramachandra, Liang Rui, Miguel Troncoso, 2013. This IBM Redbooks publication provides system

administrators and developers with the knowledge to configure an IBM WebSphere Application Server Version 8.5 runtime environment to package and deploy applications and to perform ongoing management of the WebSphere environment. As one in a series of IBM Redbooks publications and IBM Redpapers™ publications for V8.5, the entire series is designed to give you in-depth information about key WebSphere Application Server features. WebSphere Application Server V8.5 provides two runtime profiles. Every WebSphere Application Server package includes both profile types. The runtime traditionally available with the WebSphere Application Server packages is referred to as the full profile. The application serving run time provided with this profile is composed of a wide spectrum of runtime components that are available when the server is started. The full profile provides support for Java Platform Enterprise Edition 6, Java EE 6, and Enterprise OSGi technologies. The Liberty profile provides a simplified stand-alone run time for web applications supporting a subset of the programming model available with the full profile. Any application that runs on the Liberty profile will also run on the full profile. In this book, we provide a detailed exploration of the WebSphere Application Server V8.5 runtime administration process for the full profile. This book includes configuration and administration information for WebSphere Application Server V8.5 and WebSphere Application Server Network Deployment V8.5 on distributed platforms and WebSphere Application Server for IBM z/OS V8.5. This book has been updated with information about the new features in WebSphere Application Server V8.5.5. The Liberty profile administration and configuration information has been moved into a separate book. The following publications are prerequisites for this book: WebSphere Application Server New Features in V8.5.5 (REDP 4870), WebSphere Application Server V8.5.5 Technical Overview (REDP 4855), IBM WebSphere Application Server V8.5 Concepts, Planning, and Design Guide (SG24 8022). The following publications are companion books covering the Liberty profile of WebSphere Application Server: WebSphere Application Server Liberty Profile Guide for Developers (SG24 8076), WebSphere Application Server V8.5 Administration Guide for the Liberty Profile (SG24 8170).

**IT Security Policy Management Usage Patterns Using IBM Tivoli Security Policy Manager** Axel Buecker, Scott Andrews, Craig Forster, Nicholas Harlow, Ming Lu, Sridhar Muppidi, Trevor Norvill, Philip Nye, Günter Waller, Eric T. White, IBM Redbooks, 2011-10-26. In a growing number of organizations, policies are the key mechanism by which the capabilities and requirements of services are expressed and made available to other entities. The goals established and driven by the business need to be consistently implemented, managed, and enforced by the service-oriented infrastructure expressing these goals as policy, and effectively managing this policy is fundamental to the success of any IT and application transformation. First, a flexible policy management framework must be in place to achieve alignment with business goals and consistent security implementation. Second, common reusable security services are foundational building blocks for SOA environments, providing the ability to secure data and applications. Consistent IT Security Services that can be used by different components of an SOA run time are required. Point solutions are not scalable and cannot capture and express enterprise-wide policy to ensure consistency and compliance. In this IBM

Redbooks publication we discuss an IBM Security policy management solution which is composed of both policy management and enforcement using IT security services We discuss how this standards based unified policy management and enforcement solution can address authentication identity propagation and authorization requirements and thereby help organizations demonstrate compliance secure their services and minimize the risk of data loss This book is a valuable resource for security officers consultants and architects who want to understand and implement a centralized security policy management and entitlement solution **IBM Sametime 8.5.2 Administration Guide** Gabriella Davis, Marie L.
