Pediatric Hospital Medicine Ronald M. Perkin, Dale A. Newton, James D. Swift, 2008 Now in its Second Edition this text focuses exclusively on the management of hospitalized pediatric patients from admission to discharge It is an excellent resource for residency programs hospitalist fellowships and continuing education for physicians whose practice includes the management of hospitalized newborns and children Because pediatric hospital care is provided by a wide variety of healthcare professionals and in many different hospital settings this text provides a framework for unified management and effective and efficient care This edition includes new sections on emergency medicine and psychiatric hospitalization and expanded coverage of management of children with complex and chronic conditions

Ullrich, 2014-08-04 For the first time Pediatric Clinics is devoting one issue to two clinically focused topics Pediatric Palliative Care and Pediatric Hospital Medicine Dr Ottolini has organized her section to focus on a variety of issues of relevant to all pediatricians but which pose special challenge to the Pediatric Hospitalists As pediatric care has advanced children who would not have survived infancy are growing into young adults with complex chronic diseases and dependence upon technology They frequently require hospitalization to address exacerbation of underlying disease processes and procedures to improve their quality of life The articles are devoted to patient care challenges of troubleshooting malfunctioning technology co managing medically complex patients pre and post op with surgical colleagues and the Hospitalist s evolving role in performing procedures and sedation in this population of vulnerable patients Also discussed rare strategies to maximize communication with parents patients and primary care providers during hospitalization especially for medically complex patients Dr Ullrich and Dr Wolfe Pediatric have worked to bring relevant articles on palliative care to the pediatrician While life threatening conditions in childhood are rare children with LTC account for a high proportion of pediatric hospital care and about one half of such children die in the inpatient setting The number of hospital based pediatric palliative care programs has increased dramatically over the past decade to meet the palliative care needs of hospitalized children including symptom management facilitation of communication decision making and advance care planning support and coordination of care Given these considerations it is evident that the topics of pediatric palliative care and hospital medicine are fitting counterparts for this comprehensive issue

This includes important topics such as medical-legal issues, communications, electronic health records, palliative care, ethical issues, careers, professional organizations, and more. The book then moves into commonly presenting signs and symptoms. This is followed by the largest section, a breakdown of diseases by system. The text concludes with a procedures section that provides hard-to-find instruction on the procedures most commonly performed on children in a hospital setting. The Disease chapters are templated to include Background, Pathophysiology, Differential Diagnosis, Diagnostic Evaluation, Management, Special Considerations, Key Points, References, algorithms, and more. The Procedures chapters include Indications, Contraindications, Anatomy, Equipment, Procedure Preparation, Technique, Complications, and Special Considerations. Hospital Medicine and Clinical Education, An Issue of Pediatric Clinics of North America Nancy Spector, Amy Starmer, 2019-06-23. Drs. Robert Wachter and Lee Goldman coined the term hospitalist in their New England Journal of Medicine article in 1996. Hospital Medicine is now the fastest growing medical specialty in the United States due in part to the evolution of inpatient care. In this issue, the Guest Editor Dr. Nancy Spector and Consulting Editor Dr. Bonita Stanton have assembled expert authors to examine the changing nature of inpatient care, including the major movements and trends that have influenced hospital-based practice, patient-centered care, and education in this clinical learning environment. Articles are focused on the following: Quality of Care and Quality Improvement, Evidence-based Medicine, Patient Outcomes and Metrics, Interprofessional Teams, Handoffs, Patient-Centeredness, Communication with Patients, Health Literacy, Bedside Rounds, Education in the Inpatient Clinical Learning Environment, and Workplace-based Assessment, Simulation in Medical Education, Feedback, Bedside Teaching and Learning, and Hospital Medicine: State of the Specialty Looking Forward. The intended audience for this issue are frontline providers that provide care in community hospitals and faculty in academic medical centers. Pediatricians will come away with the information they need to improve patient outcomes with evidentiary support.
