Peer review in

scientific publications Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-07-28 This report indicates that the oversight of research integrity in the UK is unsatisfactory The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments researchers should aim for the gold standard of making their data fully disclosed and made publicly available The report examines the current peer review system as used in scientific publications and the related issues of research impact data management publication ethics and research integrity The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator It also says all UK research institutions should have a specific member of staff leading on research integrity The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles Innovative ways to improve current pre publication peer review practices are highlighted in the report including the use of pre print servers open peer review increased transparency and online repository style journals The growth of post publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools which the Committee encourages There should also be greater recognition of the work sometimes considered to be a burden carried out by reviewers by both publishers and employers In order to do this publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review

Health Services Reports, 2002 [Academic Journal: Editing and Publishing](#) Radhakrishnan Nair, 2017-11-29 World University rankings were announced by Thomas Reuters and The Times As an Indian besides being one teaching for nearly five decades I was eager to know the results of the announcement I showed enough concern Where have our good Indian universities higher educational institutions been placed I set my eyes on top ranks and it didn't give me anything to be proud of My eyes crossed over more than two hundred and fifty names of universities of the world including those of some not so developed countries But I came across no name of Indian institutions universities This upsets me What made the Indian educational scenario virtually get eclipsed by the scenarios of the rest of the world I drew a comparison between the higher education in India with that of many other countries The World Education scene in general occupied a higher level of degree in research and publication than that of the Indian Education scene Research flourishes when research is brought to light through publication I always advocate sound growth in Indian Education This can be achieved if we improve journal publication This awareness has resulted in this book Therefore Journal Publishing is a Cultural Imperative This book is designed to help readers understand what a journal is the people who are responsible for the creation and production of this journal how a journal is published where a journal flourishes and why it is mandatory in education development I have taken materials from all over the world and all these sources have been acknowledged in the references but for them this book would not have been a reality
