Singh, 2013-05-15 A Beginner's Guide to Sustainable Gardening Table of Contents Introduction Important Points of Sustainable Management Principles of Sustainable Gardening Some General Talk on Natural Ecosystems and Sustainable Forestry Water Harvesting Making Holding Pools Concrete Pools How to Make Your Own Pond Prefabricated Pools Miscellaneous Containers Making Natural Compost My Best Friends Earthworms Using Barnyard Produce for Making Compost Enriching The Soil with Natural Nutrients Chemical Fertilizers Seaweed water fertilizer More Natural Herbicides Saving Seeds from Last Year's Crop Maintaining your garden Beneficial Insects for Pest Control Essential Tools for Your Sustainable Garden Sustainable Gardening in Limited Spaces Know about pollinators Appendix Desertification control and rangeland management Leaf Compost Music of the hills by Saki Author Bio Introduction It was in the 1980s that the word sustainability in regard to an environment began to be associated with nature environment agriculture and thus gardening Horticulturalists believing in sustainable agriculture decided that it was easier for humans to use natural resources in a way to get better yields They have been doing this for millenniums However this drain on the natural resources was going to cause the depreciation of such resources one time or the other because mother nature cannot keep nourishing and replenishing her without getting back something of what she gave And this gave rise to the concept of sustainable gardening Harvesting things you have grown your own self from your garden is such a positive feeling of achievement The idea was that use what you can from nature's bounty and then give back to her what you can so that you and she work in tandem in a symbiotic relationship So all of us home gardeners can use sustainable gardening tips to make beautiful gardens with eco friendly designs use of biodegradable materials use of organic fertilizer and using native plants to sustain the environment and make a sustainable garden A fruitful harvest is a lovesome thing God Wot 14th century saying When I was being taught agronomy at college in the 80s nobody bothered about sustainable gardening That was because in the East the traditional agricultural practices were with the use of natural resources because the agricultural traditions still belong to the middle 14 century in many parts of the country That is why what is considered sustainable and organic gardening in the West today was an integral part of human existence in the Indian subcontinent at that time We used organic fertilizer We did not know about chemical pesticides or hormones On the flipside we did not know about agricultural development which was taking place all over the world to get a better yield of food and crops And that is why we relied on just the monsoon to feed our crops and prayed to the rain God If he did not come on time we would be sunk The bank and the money lender would take our land and then there would be no resort but to starve or go to the city to survive or lend ourselves out in bonded labor to a more prosperous farmer This may sound shocking to people in well developed countries but this is still the sort of existence which is being led by people in many parts of the world Even today in this day of state of the art technology and technological development underdeveloped countries still follow obsolete agricultural practices which do not take into account the natural resources already around them And so famine has been a

part of their lives for centuries So here are some rules which you are going to implement right now to make sustainable gardening possible

Millenniums ago a man deciding to build a garden was fortunate because he had all that land right outside his door All he had to do is clear out a piece of land and mark it with a boundary wall After that he could go hunting for attractive looking plants in the wild and bring them back home With a little bit of care and cherishing he would soon have a tame garden of his own But today a large number of us are not so fortunate Space is at a premium Concrete jungles have taken the place of what was once nature's backyard And that is why man is looking for easy options to bring beautiful greenery inside his limited space And so this book is for all those who want to know more about indoor plants how to grow them how to take care of them which are the best plant varieties which flourish indoors and tips and techniques with which you can enjoy not only a relaxing hobby but also greenery around you Until just after the Second World War indoor household plants were limited to ferns palms and potted plants which flowered in season Surely plants like aspidistras were also popular for interior decoration but soon more and more wide ranging varieties and species of foliage parted plants began to be known to keen gardeners This change is due chiefly to the architects who designed postwar buildings on severe lines Gone were the rambling houses with huge gardens Strictly utilitarian designs were utilized by architects to design these houses and flats Frankly speaking most of them were chicken coops The introduction of houseplants in a large variety of colors and fonts provided a flash of color to those austere and severe designs You could relieve the simplicity and the austerity of the home by growing houseplants indoors Thanks to the improved heating and lighting systems many varieties which were once grown in hot houses greenhouses and conservatories would now flourish indoors as houseplants There are many plants which are easier to grow and last for several years

Cultivation Bulb Failure Best Bulbs Choices Conclusion Author Bio Introduction The first time I saw a miniature garden growing in a bottle my immediate response was but how did the plants get into the bottle Naturally this amused the gardener very much and for those people who are not into the secret of how the plants got into the bottle this feat can only be on par with how did a model ship get into the bottle A garden in a bottle has about the same sort of fascination and requires almost that same amount offered dexterity and ingenuity to construct as a ship in the bottle It is also going to need a lot of patience because after all you are gardening in limited space But once your water garden is established it can be left for months without attention In many cases depending on your plans it may also not need watering So for all those people who have been really fascinated with this conversation piece when you see people surrounding a glass bottle with beautiful plants growing in it here is the beginner s guide to indoor gardening in a bottle More than 200 years ago a London physician named that Nathaniel Ward discovered that mosses as well as ferns which never grew satisfactorily in a city full of industrial fumes flourished if they were grown in the protection of a glass sided case Thanks to his experiments bottle Gardens developed in Europe and since then they have been the rage all over the world for people who are strapped for place are looking for a new hobby and also want to achieve something wonderful You can use any large bottle But the bottle has to be made of glass Carboy glass bottles are normally made for brewing beer so if you can get them cheap at a nursery nearby please do so A 5 gallon carboy bottle is going for around USD 48 on eBay USA but as my gardening books always suggest follow and advocate minimum of expense and minimum of fuss you may want to spend some time asking around in your circle of friends and neighbors for large glass bottles which is they can spare you I have seen some of these bottles kept away in garages because once upon a time they were used and the owner does not have any use for them at the moment He may not want them for another 20 years either Please do buy the bottles from your friends Otherwise a long lasting friendship can get into jeopardy when carelessly spoken words of half jesting Well he borrowed that bottle from me and what a mess he has made in it could cause subconscious rancor and ill will That is of course if he is not interested in gardening If he is a gardener he is going to demand his bottle back along with your bottle garden five years down the line You may want to tell him the purpose for this gardening experiment It is possible he may also want to give you some suggestions about plants based on his experience
