*The Biological Foundations of Organizational Behavior* Stephen M. Colarelli, Richard D. Arvey, 2015-01-02 When biological theories were used to understand behavior in the early 20th century they were often poorly understood Ideas about race ethnicity and IQ and notions of social Darwinism were based on a misunderstanding and an incomplete understanding of genetics and Darwin's theory of evolution by natural selection Now however a biological understanding of social behavior is an integral part of modern science and increasingly used in the study of behavior in organizations Yet compared with other explanatory paradigms in organizational behavior biological and evolutionary approaches are still relatively rare The Biological Foundations of Organizational Behavior provides accessible insights for scholars and practitioners in management and organizational behavior into what biology can offer their fields Chapters contain enough background to orient readers who may have little knowledge of biology and provide substantive contributions to advancing understanding of specific areas of biology and human behavior in organizations They also show how the addition of biological theory and research to organizational behavior scholarship will increase its explanatory and predictive power and contribute to its scientific foundations

**Constructing Measures** Mark Wilson, 2023-06-05 Constructing Measures introduces a way to understand the advantages and disadvantages of measurement instruments. It explains the ways to use such instruments and how to apply these methods to develop new instruments or adapt old ones based on item response modeling and construct references. Now in its second edition, this book focuses on the steps taken while constructing an instrument and breaks down the building blocks that make up an instrument: the construct map, the design plan for the items, the outcome space, and the statistical measurement model. The material covers a variety of item formats including multiple choice, open-ended, and performance items, projects, portfolios, Likert and Guttman items, behavioral observations, and interview protocols. Each chapter includes an overview of the key concepts, related resources for further investigation, and exercises and activities. A variety of examples from the behavioral and social sciences and education, including achievement and performance testing, attitude measures, health measures, and general sociological scales, demonstrate the application of the material. New to this edition are additional example contexts including a cognitive achievement example, an attitude example, and a behavioral example, and new concentrations on specific measurement issues and practices such as standard setting, computer delivery, and reporting, and going beyond the Likert response format. Constructing Measures is an invaluable text for undergraduate and graduate courses on item test or instrument development, measurement item response theory, or Rasch analysis, taught in a variety of departments including education, statistics, and psychology. The book also appeals to practitioners who develop instruments, including industrial, organizational, educational, and school psychologists, health outcomes researchers, program evaluators, and sociological measurers.
