**Defence Planning and Uncertainty** Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future

**China's Military Modernization** Richard D. Fisher, Jr.,2008-09-30 China's rise to global economic and strategic eminence with the potential for achieving pre eminence in the greater Asian region is one of the defining characteristics of the post Cold War period This work offers a basic understanding of the military strategic basis and trajectory of a rising China provides background and outlines current and future issues concerning China's rise in strategic military influence The next decade may witness China's assertion of military or strategic pressure on Japan the Korean Peninsula India the South China Sea the Taiwan Strait Central Asia or even on behalf of future allies in Africa and Latin America While conflict is not a foregone conclusion as indicated by China's increasing participation in many benign international organizations it is a fact that China's leadership will pursue its interests as it sees them which may not always coincide with those of the United States its friends and allies Until now no single volume has existed that provides an authoritative comprehensive and concise description of China's evolving geo strategy or of how China is transforming its

military to carry out this strategy Fisher examines how China's People's Liberation Army PLA remains critical to the existence of the Chinese Communist government and looks at China's political and military actions designed to protect its expanded strategic interests in both the Asia Pacific and Central to Near Asian regions Using open sources including over a decade of unique interview sources Fisher documents China's efforts to build a larger nuclear force that may soon be protected by missile defenses modern high technology systems for space air and naval forces and how China is now beginning to assemble naval air and ground forces for future power projection missions His work also examines how the United States and other governments simultaneously seek greater engagement with China on strategic concerns while hedging against its rising power Although China faces both internal and external constraints on its rise to global eminence it cannot be denied that China's government is pursuing a far reaching strategic agenda **Department of Defense**

**Authorization for Appropriations for Fiscal Year 2007** United States. Congress. Senate. Committee on Armed Services,2007 **Axis of Convenience** Bobo Lo,2009-08-01 Few relationships have been as misunderstood as the strategic partnership between Russia and China Official rhetoric portrays it as the very model of international cooperation Moscow and Beijing claim that ties are closer and warmer than at any time in history In reality however the picture is highly ambiguous While both sides are committed to multifaceted engagement cooperation is complicated by historical suspicions cultural prejudices geopolitical rivalries and competing priorities For Russia China is at once the focus of a genuine convergence of interests and the greatest long term threat to its national security For China Russia is a key supplier of energy and weapons but is frequently dismissed as a self important power whose rhetoric far outstrips its real influence **Axis of Convenience** cuts through the mythmaking and examines the Sino Russian partnership on its own merits It steers between the overblown interpretation of an anti Western particularly anti American alliance and the complacent assumption that past animosities and competing agendas must always divide the two nations Their relationship reflects a new geopolitics one that eschews formal alliances in favor of more flexible and opportunistic arrangements Ultimately it is an axis of convenience driven by cold eyed perceptions of the national interest In evaluating the current state and future prospects of the relationship Bobo Lo assesses its impact on the evolving strategic environments in Central and East Asia He also analyzes the global implications of rapprochement between Moscow and Beijing focusing in particular on the geopolitics of energy and Russia China U S triangularism **Thirty Years of China-U.S. Relations** Sujian Guo,Baogang Guo,2010-01-01 This book examines structural factors ideas institutions issues and challenges that have shaped China U S relations in the past thirty years as well as the recent changes in the global geostrategic landscape and economic interdependence that have significant impacts on the bilateral relations into the 21st century *Dragon on Terrorism: Assessing China's Tactical Gains and Strategic Losses Post-September 11* , **Report to Congress of the U.S.-China Economic and Security Review Commission** U.S.-China Economic and Security Review Commission,2016 Trading with the Enemy Hugo

Meijer,2016-03-01 In light of the intertwining logics of military competition and economic interdependence at play in US China relations *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People's Republic of China PRC To do so Hugo Meijer investigates a strategically sensitive yet under explored facet of US China relations the making of American export control policy on military related technology transfers to China since 1979 *Trading with the Enemy* is the first monograph on this dimension of the US China relationship in the post Cold War Based on 199 interviews declassified documents and diplomatic cables leaked by Wikileaks two major findings emerge from this book First the US is no longer able to apply a strategy of military technology containment of China in the same way it did with the Soviet Union during the Cold War This is because of the erosion of its capacity to restrict the transfer of military related technology to the PRC Secondly a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US China relationship by moving beyond the Cold War trade off between the two in order to maintain American military preeminence vis vis its strategic rivals By focusing on how states manage the heterogeneous and potentially competing security and economic interests at stake in a bilateral relationship this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy where rivals in the military realm are also economically interdependent **A War Like No**

**Other** Richard C. Bush,Michael E. O'Hanlon,2007-04-01 Nobody approaches the objectivity and precision of Bush and O Hanlon when it comes to analysis of the military and political dimensions of the Taiwan issue This is one challenge that U S policymakers and military strategists cannot afford to get wrong and scholars cannot afford to ignore Michael Green former Senior Director for Asian Affairs National Security Council *The Showdown to Come* In 1995 during a heated discussion about that year's Taiwan crisis a Chinese general remarked to a U S diplomat In the end you care more about Los Angeles than you do about Taipei In a single sentence he both questioned the level of America's commitment to a longtime ally and threatened massive perhaps nuclear retaliation should the United States intervene militarily on Taiwan's behalf In the end President Clinton sent two aircraft carriers to the region and China ceased its military exercises in the Taiwan Strait A decade later however China is much stronger both economically and militarily and it holds a significant amount of America's national debt If another Taiwan crisis should occur as it almost certainly will would China back down In *A War Like No Other* you'll discover how little it would take to transform the close cooperation and friendly rivalry between the United States and the People's Republic of China into the first ever shooting war between two nuclear powers This chilling look into one possible future offers thoughtful advice to both governments on how to reduce the chances of such a nightmare actually occurring Two Brookings Institution scholars offer specific prescriptions on how the two nations can improve communications especially in times of crisis avoid risky behavior even when provoked and above all remember which buttons not to push

US-China Relations in the 21st Century Zhiqun Zhu,2006-04-18 *US China Relations in the 21st Century* addresses the

bilateral relations of these two nations on an international domestic societal and individual level between 1990 and 2005  
Peaceful power shifts remain a central dilemma in world politics since historically power transition from a dominant nation to a challenger has been associated with international wars This book examines whether China and the US can learn from history and manage a potential power transition peacefully Zhiqun Zhu selects two important cases of power transitions in history as the background for this study power rivalry between Great Britain and Germany that led to the First World War the peaceful power transition from Great Britain to the United States US China Relations in the 21st Century contributes to the current International Relations theory by proposing a new analytical model on global power transition and providing recommendations for peacefully handling a potential power transition from the US to China in the future This original and comprehensive study is essential reading for scholars of US and Chinese foreign policy world politics and international relations
