

# Pro Choice Abortion: Because It's Safer

## Introduction

Whether or not a women should be able to legally have an abortion in the United States is a very controversial issue. Abortion is the deliberate termination of a pregnancy. It became legal in 1973 after the deliberation of the supreme court case 'Roe vs. Wade'. Before then it was very hard for women to have abortions and many sought out doing it on their own. Since as early as the 13th century abortion has been considered homicide. As far as current laws, abortion is legal throughout the United States but some states make it harder to get one. For example, Mississippi has some of the most restrictive laws which makes it the hardest state to get an abortion. In fact the state itself only has one functional Planned Parenthood clinic.

Other states like California and New Mexico have minimal restrictions. Many women who want to have an abortion have to travel across state lines because of their states' restrictive laws. For example a woman from Oklahoma had to travel 4 hours to Kansas just to have an abortion. Southern states typically have stricter abortion laws. States like Missouri and Mississippi only have one abortion clinic in the whole state. Other states like California and New York have a large amount of abortion clinics. Great intro! Informative and detailed, sets reader up to know enough to get into perspectives.

## Main Body of Paper

Abortion is currently, and has been throughout the 21st Century, a controversial issue.

Primarily there have two main sides the argument, pro choice and pro life. Majority of the reasoning on the pro choice is that a woman should be able to have the right to do what she wants with her body. The U.S. Supreme court has also declared the right to abort as a "fundamental right" which is described as a basic human right. Other examples of fundamental rights are privacy and procreation. A lot people also explain that there are many reasons as to why a woman may need to have an abortion. (look at how the sentence before this is worded) Medical complications for the mother and baby may be an issue or a woman may simply not have the means to take care of a child. The pro life side of the argument says that the fetus is a human being and they should have the right of life. A baby should not be terminated simply because a woman is not ready to have a child. To them abortion is considered murder because you are terminating one's life. Another pro life argument is that human life begins at conception so a baby has the right to live just like any other person. Well done paragraph on two sides of abortion argument

## Religious Beliefs on Abortion and its Impact on Abortion Law in the U.S.

Religious perspectives also contribute to whether or not a woman gets an abortion, which in the end would affect her health. In those religions in which a woman is banned from having an abortion, the health effects of having an abortion are more negative.

*Abortion Care as Moral Work* Johanna Schoen, 2022-06-30 *Abortion Care as Moral Work* brings together the voices of abortion providers abortion counselors clinic owners neonatologists bioethicists and historians to discuss how and why providing abortion care is moral work The collection offers voices not usually heard as clinicians talk about their work and their thoughts about life and death In four subsections Providers Clinics Conscience and The Fetus the contributions in this anthology explore the historical context and present day challenges to the delivery of abortion care Contributing authors address the motivations that lead abortion providers to offer abortion care discuss the ways in which anti abortion regulations have made it increasingly difficult to offer feminist inspired services and ponder the status of the fetus and the ethical frameworks supporting abortion care and fetal research Together these essays provide a feminist moral foundation to reassert that abortion care is moral work Scientific developments relating to the Abortion Act 1967 Great Britain: Parliament: House of Commons: Science and Technology Committee, 2007-11-15 Scientific developments relating to the Abortion Act 1967 Twelfth report of session 2006 07 Vol 2 Oral and written Evidence **Pro-Life Activists in America** Carol J. C. Maxwell, 2002-08-12 Maxwell offers an oral history of pro life direct activism in America from the late 1970s to the early 1990s Through the stories of leaders and followers men and women Catholics and evangelicals Carol Maxwell explores the complex beliefs and desires that gave rise to this activism sustained and eventually undid it Maxwell s interdisciplinary approach weaves theory from sociology political science anthropology and moral philosophy She pays special attention to several key issues the role of the participants diverse concepts of salvation concerns about social change their unresolved grief their personal experiences of abortion and differences in men s and women s commitment to protest The book offers a unique window into the minds of individual protestors as they shifted from conventional activism to direct action and gives an important account of the direct action movement as its initial commitment to Gandhian non violence was broken by the lethal acts that accompanied its end **Abortion, Motherhood, and Mental Health** Ellie Lee, Whatever reproductive choices women make whether they opt to end a pregnancy through abortion or continue to term and give birth they are considered to be at risk of suffering serious mental health problems According to opponents of abortion in the United States potential injury to women is a major reason why people should consider abortion a problem On the other hand becoming a mother can also be considered a big risk This fine well balanced book is about how people represent the results of reproductive choices It examines how and why pregnancy and its various outcomes have come to be discussed this way The author s interest in the medicalization of reproduction its representation as a mental health problem first arose in relation to abortion There is a very clear contrast between the construction of women who have abortions implied by moralized argument against abortion and the construction that results when the case against abortion focuses on its effects on women s mental health Lee argues that claims that connect abortion with mental illness have been limited in their influence but this is not to suggest that they have

not become a focus for discussion and have had no impact The limits to such claims about abortion do not by any means suggest limits to the process of the medicalization of pregnancy more broadly that is a process of demedicalization The final theme of Ellie Lee's book is the selective medicalization of reproduction Centering on the claim that abortion can create a post abortion syndrome the author examines the medicalization of the abortion problem on both sides of the Atlantic Lee points to contrasts in legal and medical dimensions of the abortion issue that make for some important differences but argues that in both the United States and Great Britain the post abortion syndrome claim constitutes an example of the limits to medicalization and the return to the theme of motherhood as a psychological ordeal Lee makes the case for looking to the social dimensions of mental health problems to account for and understand debates about what makes women ill Ellie Lee is research fellow in the Department of Sociology and Social Policy University of Southampton Highfield United Kingdom
