Metrics for Sustainable Business Scott R. Herriott, 2016-02-19

Metrics for Sustainable Business is the first book to give students a comprehensive understanding of sustainability in organizations from an accounting perspective. The book walks student through the steps for doing a sustainability assessment and aims to develop them into financial analysts who understand sustainability reports and are able to create or audit them. While most books focus on environmental issues, Herriott trains his gaze on the corporate and institutional perspective covering measurement systems, how to evaluate and improve a standard, and conducting a life cycle assessment. Walking students through the programs of disclosure, the varying standards for corporate ratings, and organizational certification allows them to grasp the tools for conducting a sustainability assessment and auditing reports. Chapters on accounting for greenhouse gas emissions, water use, and waste introduce students to the technical details in sustainability accounting, while a chapter on the philosophies of sustainability offers an answer to the question: Why are they asking us to report that? Richly demonstrated with practical examples and informative visuals, this book will serve students of sustainability accounting and integrated reporting.

*When Culture Hates You* Natasha Crain, 2025-02-04

Jesus Warned the World Would Hate Christians. If the world hates you, know that it has hated me before it hated you. John 15:18. As cultural hostility toward Christianity intensifies, many Christians have grown more reluctant to advocate for biblical values in the public square. But our perseverance for the common good, a good defined by God alone, is more important than ever in a culture that embraces darkness. *When Culture Hates You* is a call for Christians to unashamedly pursue righteousness in society out of our love for others. In this timely resource, author Natasha Crain will help you make sense of cultural hostility by better understanding the roots of secular outrage on issues like Christian nationalism, social justice, abortion, transgenderism, and sexuality. Advocate for the godly functioning of society with greater biblical, cultural, and civic understanding. Take concrete action for the common good with more than 35 practical ideas to get you started. As Christians, our calling is to speak truth in the face of hostility. Not because we want to war with culture, but because we love both God and others.

**How to Run a School** Andrew

Hampton, 2025-05-15

Headteachers need to have a view on every possible aspect of running a school and be able to justify and articulate a set of values that tie into their vision. The UK-Nigeria Remittance Corridor Raúl Hernández-Coss, Chinyere Egwuagu Bun, 2007-01-01 This study is the first research work on remittances conducted in Nigeria and reveals the actual state of its remittance market. The report describes how United Kingdom residents of Nigerian origin transfer remittances home and how the funds are distributed to their beneficiaries in Nigeria. The review presents the remittance industry conditions existing in the UK-Nigeria remittance corridor at the origination and distribution stages of the transactions and the intermediaries who facilitate the transfers. The report makes conclusions and compares these main findings with lessons from other corridors. The UK-Nigeria remittance corridor has an equal dominance of formal and informal remittance intermediaries. Although several formal financial institutions for transferring money exist in the UK, many people choose to send money informally. More collaboration between the UK and Nigeria is necessary to develop the remittance market to encourage the use of formal channels and to enhance the development potential. Among its benefits, the remittance country partnership RCP between UK and Nigeria aims to reduce the cost of remittance transfers. The Nigerian government is engaging its diaspora to help spur economic growth. This report recommends that each government focus on improving data collection at its end of the corridor and do more research to provide its policymakers and its private sector with accurate information.
