Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Children, Education and Geography Lauren Hammond, Mary Biddulph, Simon Catling, John H. McKendrick, 2022-11-30 This book

examines the intersections between children education and geography With a particular focus on children s geographies and geographies of education the book draws upon cutting edge research to consider how geographical education can be enhanced through increased engagement with these fields The book is underpinned by the position that the lives of children and young people are inherently geographical as are educational institutions systems and processes The volume explores the ways in which the diverse relationships between children education and geography can enrich research and work with and for children and young people Chapters in this book consider how injustices are reproduced through education Chapters also explore how insights generated by thinking in and across geography and education can be used to support and empower young people in both formal education and in their everyday lives Ultimately this book is written for children and young people Not as the readership but as people often marginalised in decision making at a variety of scales in education and who we contend should be at the heart of all educational thinking The book is of value to undergraduate and post graduate students interested in geography education and children s geographies as well as teachers of geography both new and experienced

National Security, Democracy, & Good Governance in Post-Military Rule Nigeria, Volume One Dr. Dan Mou, 2016-12-30 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the seventy one percent 71% of Nigerias population still living below poverty line This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness the worst civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use

Global Health and Geographical Imaginaries

Clare Herrick, David Reubi, 2017-03-16 To date geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health However the compulsion to do and understand global health emerges largely from

contexts that geography has long engaged with urbanisation globalisation political economy risk vulnerability lifestyles geopolitics culture governance development and the environment Moreover global health brings with it an innate powerful and politicising spatial logic that is only now starting to emerge as an object of enquiry This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed critical global health studies Geographical perspectives this collection argues are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions Thus rather than rehearsing the frequent critique that global health is more a set of problems than a coherent disciplinary approach to ameliorating the health of all and redressing global bio inequalities this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself but in so doing brings forth a series of new conceptual methodological and empirical contributions to social scientific multidisciplinary scholarship

Dislocating the Orient Daniel Foliard, 2017-04-13 While the twentieth century's conflicting visions and exploitation of the Middle East are well documented the origins of the concept of the Middle East itself have been largely ignored With *Dislocating the Orient* Daniel Foliard tells the story of how the land was brought into being exploring how maps knowledge and blind ignorance all participated in the construction of this imagined region Foliard vividly illustrates how the British first defined the Middle East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps Until then the region had never been clearly distinguished from the East or the Orient In the course of their colonial activities however the British began to conceive of the Middle East as a separate and distinct part of the world with consequences that continue to be felt today As they reimagined boundaries the British produced disputed and finally dramatically transformed the geography of the area both culturally and physically over the course of their colonial era Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being *Dislocating the Orient* will interest historians of the Middle East the British empire cultural geography and cartography

Routledge Handbook of Marxian Economics David M. Brennan, David Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives One such alternative is provided by Marxian economics In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways This handbook contains thirty seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics Its scope is broad ranging from contributions on familiar Marxist concepts such as value theory the labor process accumulation crisis and socialism to others not always

City Unsilenced Jeffrey Hou, Sabine Knierbein, 2017-06-26 What do the recent urban resistance tactics around the world have in common? What are the roles of public space in these movements? What are the implications of urban resistance for the remaking of public space in the age of shrinking democracy? To what extent do these resistances move from anti to alter politics? *City Unsilenced* brings together a cross-disciplinary group of scholars and scholar activists to examine the spaces, conditions and processes in which neoliberal practices have profoundly impacted the everyday social, economic and political life of citizens and communities around the globe. They explore the commonalities and specificities of urban resistance movements that respond to those impacts. They focus on how such movements make use of and transform the meanings and capacity of public space. They investigate their ramifications in the continued practices of renewing democracies. A broad collection of cases is presented and analyzed, including: Movimento Passe Livre, Brazil; Google Bus Blockades, San Francisco, USA; the Platform for Mortgage Affected People (PAH), Spain; the Piqueteros Movement, Argentina; Umbrella Movement, Hong Kong; post-Occupy Gezi Park, Turkey; Sunflower Movement, Taiwan; Occupy Oakland, USA; Syntagma Square, Greece; Researchers for Fair Policing, New York; Urban Movement Congress, Poland; urban activism, Berlin; 1DMX, Mexico; Miyashita Park, Tokyo, Japan; 15M Movement, Spain; and Train of Hope and protests against Academic Ball in Vienna, Austria. By better understanding the processes and implications of the recent urban resistances, *City Unsilenced* contributes to the ongoing debates concerning the role and significance of public space in the practice of lived democracy.
