Citizenship and Democratization: Perspectives from Different Gender-Theoretical Approaches Eva Maria Hinterhuber,Jana Günther,2024-01-30 The year 1918 was significant in many ways seeing the end of World War 1 At the same time the impact and transformational effects of this event enabled civil society activists and politically institutionalised actors in European countries to pick up the threads of democratic social movements and parliamentary aspirations and make use of political opportunity structures to obtain citizen rights for larger parts of the population One result of this process albeit with a difference between European states was that more groups in society gained suffrage Amongst those were large sections of the working class and women While the vote was won for some new social groups in European societies others were still excluded After one centennium of struggle for political participation we would like to discuss specific problems of politics of belonging The question concerning the full recognition of citizen rights was and continually is connected to ideas of a specific membership of a nation state a fact that denotes the particular problem of membership and non membership and of inside and outside This Research Topic will take account of this special field of tension of democratisation e g inclusion through exclusion from a perspective of social history political science gender studies and intersectionality approaches This analytical foil shall be used to examine the relationship between state or government action and civil society as well as the reproduction of social and political inequality despite increasing democratisation movements Global Governance, Human Rights and International Law Errol P. Mendes,2022-08-18 This book offers a stimulating introduction to the links between

areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas it argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community Following the election of President Donald Trump the second edition will explore how we are witnessing a critical battle to ensure that human rights international law and the beneficial aspects of globalization will still be relevant and applied in some of the critical institutions of global governance and in the operations of the global private sector The second edition will focus on how States institutions and global civil society will have to ramp up the struggle to fight this tragic flaw that is now even more evident with the actions of the US and other authoritarian states like China and Russia in this second decade of the 21st Century *10 Years of Ethnopharmacology* Michael Heinrich, 2020-07-08 The contributions selected for this ebook
