South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Scientific Foundations and Practical Applications of Periodization G. Gregory Haff, 2024-02-26 The concept of periodization is not new, with the precursors of periodized training dating back more than 2,000 years ago. But it is now obvious that the holistic development of an athlete encompasses more than their physical and tactical training. *Scientific Foundations and Practical Applications of Periodization* is the first book of its kind designed to optimize sport performance by integrating both classic and modern periodization theories with recovery methodologies, nutritional interventions and athlete monitoring guidelines. Written by G. Gregory Haff, a

world leading expert on periodization Scientific Foundations and Practical Applications of Periodization incorporates the latest scientific evidence to provide a comprehensive understanding of how to implement planning and programming strategies to enhance physiological adaptations While other periodization books may discuss training theory few provide information on how to integrate various training models into the periodization process Here are just some of the approaches incorporated into Scientific Foundations and Practical Applications of Periodization Employing and blending parallel sequential and emphasis periodization models to develop athletes Syncing recovery strategies with various phases and periods of training to enhance the adaptational process Manipulating nutritional strategies to magnify performance Using and interpreting monitoring data to adjust an athlete s program in accordance with the periodized plan Applicable for athletes at all levels and in any sport Scientific Foundations and Practical Applications of Periodization translates the latest research into usable information that directly enhances programming You will have access to real world practical examples and discussions of how to make scientifically sound programming decisions A glossary of over 400 terms will help you digest the content Plus you will find periodization templates and directions on how to use them to create annual training mesocycle and microcycle plans Templates are provided online via HKPropel to help you easily design periodized programs Get the most comprehensive resource about periodization ever written and use scientific evidence to take your periodization programming to the next level with Scientific Foundations and Practical Applications of Periodization Earn continuing education credits units A continuing education exam that uses this book is also available It may be purchased separately or as part of a package that includes both the book and exam Note A code for accessing HKPropel is not included with this ebook but may be purchased separately

Forecast and Urban Development Patterns Sonny Conder,1964 Blue Helmet Bureaucrats Margot Tudor,2023-04-27

This history of colonial legacies in UN peacekeeping operations from 1945 1971 reveals how United Nations peacekeeping staff reconfigured the functions of global governance and sites of diplomatic power in the post war world Despite peacekeeping operations being criticised for their colonial underpinnings our understanding of the ways in which colonial actors and ideas influenced peacekeeping practices on the ground has been limited and imprecise In this multi archival history Margot Tudor investigates the UN s formative armed missions and uncovers the officials that orchestrated a reinvention of colonial era hierarchies for Global South populations on the front lines of post colonial statehood She demonstrates how these officials exploited their field based access to perpetuate racial prejudices plot political interference and foster protracted inter communal divisions in post colonial conflict contexts Bringing together histories of humanitarianism decolonisation and the Cold War Blue Helmet Bureaucrats sheds new light on the mechanisms through which sovereignty was negotiated and re negotiated after 1945 Impact of Traumatic Brain Injuries on Participation in

Daily Life and Work: Recent Research and Future directions Nada Andelic,Cecilie Roe,Marianne Løvstad,Anne Norup,Jennie L. Ponsford,2020-01-16 *Heart Rate Variability, Health and Well-being: A Systems Perspective* Robert Drury,J. P.

Ginsberg,Stephen W. Porges,Julian F. Thayer,2020-01-09 The development of a new tool analytic device or approach frequently facilitates rapid growth in scientific understanding although the process is seldom linear The study of heart rate variability HRV defined as the extent to which beat to beat variation in heart rate varies is a rapidly maturing paradigm that integrates health and wellness observations across a wide variety of biomedical and psychosocial phenomena and illustrates this nonlinear path of development The utility of HRV as an analytic and interventive technique goes far beyond its original application as a robust predictor of sudden cardiac death This Research Topic aims to provide a conceptual framework to use

in exploring the utility of HRV as a robust parameter of health status using a broad and inclusive definition of health and well being From the broadest perspective current biomedical science emerged from shamanistic and religious healing practices and empirically observed interventions made as humans emerged from other hominins The exponential growth of physics chemistry and biology provided scientific support for the model emphasizing pathology and disorders Even before the momentous discovery of germ theory sanitation and other preventive strategies brought about great declines in mortality and morbidity The revolution that is currently expanding the biomedical model is an integrative approach that includes the wide variety of non physio chemical factors that contribute to health In the integrative approach health is understood to be more than the absence of disease and emphasis is placed on optimal overall functioning within the ecological niche occupied by the organism This approach also includes not just interventive techniques and procedures but also those social and cultural structures that provide access to safe and effective caring for sufferers Beyond the typical drug and surgical interventions which many identify with the Western biomedical model that currently enjoys an unstable hegemony such factors also include cognitive behavioral social and cultural practices such as have been shown to be major contributors to the prevention and treatment of disease and the promotion of health and optimal functioning This Integrative Model of Health and Well being also derives additional conceptual power by recognizing the role played by evolutionary processes in which conserved adaptive human traits and response tendencies are not congruent with current industrial and postindustrial global environmental demands and characteristics This mismatch contributes to an increasing incidence of chronic conditions related to lifestyle and health behavior Such a comprehensive model will make possible a truly personalized approach to health and well being including and going far beyond the current emphasis on genomic analysis which has promised more than it has currently delivered HRV offers an inexpensive and easily obtained measure of neurovisceral functioning which has been found to relate to the occurrence and severity of numerous physical disease states as well as many cognitive behavioral health disorders This use of the term neurovisceral refers to the relationships between the nervous system and the viscera providing a more focused and specific conceptual alternative to the now nearly archaic mind body distinction This awareness has led to the recent and growing use of HRV as a health biomarker or health status measure of neurovisceral functioning It facilitates studying the complex two way interaction between the central nervous system and other key systems such as the cardiac gastroenterological pulmonary and immune systems The utility of HRV as a broad spectrum health indicator with possible application both clinically and to population health has only begun to be explored Interventions based on HRV have been demonstrated to be effective evidence based interventions with HRV biofeedback treatment for PTSD representing an empirically supported modality for this complex and highly visible affliction As an integral measure of stress HRV can be used to objectively assess the functioning of the central enteric and cardiac nervous systems all of which are largely mediated by the vagal nervous complex HRV has also been found to be a measure of central neurobiological concepts such as

executive functioning and cognitive load The relatively simple and inexpensive acquisition of HRV data and its ease of network transmission and analysis make possible a promising digital epidemiology which can facilitate objective population health studies as well as web based clinical applications An intriguing example is the use of HRV data obtained at motor vehicle crash sites in decision support regarding life flight evacuations to improve triage to critical care facilities This Research Topic critically addresses the issues of appropriate scientific and analytic methods to capture the concept of the Integrative Health and Well being Model The true nature of this approach can be appreciated only by using both traditional linear quantitative statistics and nonlinear systems dynamics metrics which tend to be qualitative The Research Topic also provides support for further development of new and robust methods for evaluating the safety and effectiveness of interventions and practices going beyond the sometimes tepid and misleading gold standard randomized controlled clinical trial
