Using a dictionary

Most beginning language learners consider the dictionary as the ultimate resource for reading, writing, and speaking. While it is true that the dictionary is a useful tool that can provide valuable information about vocabulary, using the dictionary correctly requires that you understand the elements of each entry.

If you glance at a Spanish-English dictionary, you will notice that its format is similar to that of an English dictionary. The word is listed first, usually followed by its pronunciation. Then come the definitions, organized by parts of speech. Sometimes the most frequently used definitions are listed first.

To find the best word for your needs, you should refer to the abbreviations and the explanatory notes that appear with the entries. For example, imagine that you are writing about your position. You want to write, "I want to buy a new racket for my tennis racquet," but you don't know the Spanish word for "racket." In the dictionary, you may find an entry like this:

racket *v. l. alfilerete. l. raqueta (tenis).*

l. corresponds to alfilerete (nail). Then, the first word you see is alfilerete. When you look that word up, you find that definition of alfilerete is wire or nail, or alfilerete is probably not the word you're looking for. The second word is raqueta, followed by the abbreviation dep., which stands for deportes. This indicates that the word raqueta is the best choice for your needs.
