Questions and Answers, 1970 *Explorative Guide on Motorcycle Maintenance* Cuthred E a Ivar, 2023-11-27 There is a huge difference between having the bolt and a few aftermarket parts onto a motorcycle and building a motorcycle Building a motorcycle requires the ability to design something unique but also have the skill to build it That often means you will need a few things that will enable you to fabricate parts from raw materials or modify existing parts to your needs Mastering every skill needed to make a motorcycle from the ground up could take a lifetime However there are a few things that will let you build the bulk of the motorcycle without having to build custom parts or simply build your dream bike having the skill will help keep your costs down and guarantee a successful outcome So you want to build a motorcycle The best method when building your first bike is to have more confidence in yourself than in the best design for a motorcycle guide You would be surprised how many people build motorcycles Not everybody out there is a dud and many of them come from completely different backgrounds and environments Cut the motorcycle building process into small steps and build your own skillset Just like a musician a motorcycle builder tends to have their own workflow On the other hand for most people it started much later If you have never built your own custom bike with your own set of common tools and a good understanding of the process and the tools for you to work on and build your own custom motorcycle Build your own hobby other than just riding One of the best would be building a motorcycle model kit There is a lot of satisfaction and gratification when you assembled something that came in pieces into a finished bike You don't have to be a professional to have a discipline and a commitment to work through all the challenges and frustrations to move with the end result Good thing I bet you don't feel happy when the bike finally meets with its destiny
