Better Choices Greg Mills, Mcebisi Jonas, Haroon Bhorat, Ray Hartley, 2022-04-01. A must-read accessible and skilful account of South Africa's socio-economic challenges, policy and governance choices. THEMBA MASEKO. All the numbers on South Africa's crisis dashboard are blinking red. The economy is failing to grow and more and more young people find themselves on the outside looking in as education falters and jobs disappear. Energy and transport are in crisis. Governance is floundering as debt mounts and government runs out of money. Better Choices is a collection by South Africa's top thinkers on the political economy providing an unflinching account of the myriad challenges the country faces. The picture that emerges is of a nation on the brink of a catastrophic slide into failure unless better, if tough, policy choices are made. As stark as these problems are, their solutions are tantalisingly close at hand. The chapters in this book outline exactly the solutions, those better choices that need to be made by leadership to alter the country's bleak trajectory. South Africa cannot talk its way out of trouble. Key to success is removing the sources of friction: the red tape, over-regulation and rents that slow down investment. This is only possible if a more effective, focused government acts decisively. Compiled by The Brenthurst Foundation, Africa's leading think tank on economic development. Better Choices is for those who want to build a positive, inclusive future for South Africa.

Workers' Education in the Global South Linda Cooper, 2020-03-31 Workers Education in the Global South explores the historical development of radical workers education in South Africa as one particular strand within the broader tradition of radical adult education Drawing on the theoretical resources of Activity Theory Gramsci Freire and others it investigates the key features of workers education as a form of pedagogy with a unique history and logic of practice and explores how it has been shaped by its location within labour and other social movements as well as its southern location within the global political economy Successive chapters explore its counter hegemonic but contested purposes its knowledge practices that seek to overcome the historical divide between intellectual and manual labour and a pedagogy which often assumes didactic forms but which retains a democratic character through its embeddedness in working class experience It illustrates the rich processes of experiential learning that happen through day to day organising in workers cultural activity as well as through mass action It argues that this tradition of workers education currently stands at a crossroads as global neoliberal market policies and post apartheid education and training policies threaten to undermine its radical social vision and concludes by offering ideas on how this tradition of radical workers education might be renewed

Change Management in TVET Colleges Kraak, Andre, Paterson, Andrew, 2016-07-25 The Technical and Vocational Education and Training TVET college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post school education sector and the

increasing difficulty of current conditions The triple challenge of poverty inequality and unemployment weighs heavily on the social political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges Despite laudable increases in TVET enrolment the education system needs to work harder to accommodate the weight of demand for post school further education and training FET band qualifications from young people not in education employment or training At the same time it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers This collection offers a set of research papers that provide new analytic and empirical material on The political economy of TVET types in different countries which by comparison illuminate the South African case A periodisation of government interventions in the TVET sector over the last three decades The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service The halting evolution of collegial relationships between college lecturers towards higher collegiality Employer expectations of college graduates and how colleges are responding and An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape This book will offer valuable information and insights for decision makers as well as analysts of institutional change concerning links between education and economic growth with particular regard to TVET graduates employment rates
