## Saab 2000 Manual:

*Human Factors for Civil Flight Deck Design* Don Harris, 2017-03-02 Human error is now the main cause of aircraft accidents. However, in many cases, the pilot simply falls into a trap that has been left for him/her by the poor design of the flight deck. This book addresses the human factors issues pertinent to the design of modern flight decks. Comprising of invited chapters from internationally recognised experts in human factors and flight deck design, contributions span the world of industry, government, research establishments and academia. The book brings together the practical experience of professionals across the human factors and flight deck design disciplines to provide a single all-encompassing volume. Divided into two main parts, part one of the book examines the benefits of human engineering flight deck design: process, head-down display design, head-up display design, auditory warning systems, flight control systems, control inceptors and aircraft handling qualities, flight deck automation and human-computer interaction on the flight deck, and anthropometrics for flight deck design. Part two is concerned with flight deck evaluation: the human factors evaluation of flight decks, human factors in flight test and the regulatory viewpoint. Of interest to all human factors professionals operating in high technology, high risk dynamic industries as well as those engaged directly in aerospace activities, the book will also be of key importance to engineers with an interest in human factors for flight deck design, academics and third year and post graduate human factors, ergonomics and psychology students.

papers focusing on the significant advancements that have occurred in this field concerning numeric modeling electric actuation and composite materials. Additionally, papers discussing self-powered landing gear and more electrical overall aircraft architectures have been included. The content of *Advances in Aircraft Landing Gear* is divided into two sections: Analysis and Design Methods and Electric Actuation Control and Taxi. For those looking for more information on aircraft landing gears, the SAE A-5 committee, the Aerospace Landing Gear Systems Committee, which meets twice a year, serves as a useful forum for discussion on landing gear issues and development.
