Operations Garcia, Antonio,2018-08-16 The creation of the Force Intervention Brigade FIB as the sharp tactical edge of the United Nations Stabilisation Mission in the Democratic Republic of the Congo MONUSCO tasked with the neutralising of armed groups was a watershed moment in the history of modern peace missions What was more significant was that sub Saharan national leaders were instrumental in the creation of the FIB South Africa Tanzania and Malawi but lacked the resources to deploy such a force and consequently the brigade was deployed under the banner of the UN With the legacy of an African Renaissance and its role in the conception of the FIB South Africa remains a critical player in international peace and security in sub Saharan Africa and therefore holds a key strategic role in achieving the FIB s objectives This comes at a critical time where blue helmets are increasingly exposed to complex and challenging security contexts The aim of this work is to provide a conceptual model for South African military future operations and UN offensive peacekeeping operations In this undertaking a layer of military and Clausewitzian theory is added to offensive peacekeeping operations Furthermore there are sections on operational constructs capstone and operating concepts doctrine and structural elements as well a section on mine action This book contributes towards an understanding of the nature of modern strategy through the lens of UN offensive peacekeeping operations and provides insights into operational challenges **Numerical Methods and**

Implementation in Geotechnical Engineering - Part 1 Y.M. Cheng,J. H. Wang,L. Liang,W. H. Fung Ivan,2020-04-01

Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering The first part of this reference set includes methods such as the finite element method distinct element method discontinuous deformation analysis numerical manifold method smoothed particle hydrodynamics method material point method plasticity method limit equilibrium and limit analysis plasticity slope stability and foundation engineering optimization analysis and reliability analysis The authors have also presented different computer programs associated with the materials in this book which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods classical and modern in comprehensive readable volumes *Numerical Methods and Implementation in*

Geotechnical Engineering - Part 2 Y.M. Cheng,J. H. Wang,L. Liang,W. H. Fung Ivan,2020-04-20 Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering The second part of this reference set includes more information on the distinct element method geotechnical optimization analysis and reliability analysis Information about relevant additional numerical methods is also provided in each chapter with problems where applicable The authors have also presented different computer programs associated with the materials

in this book set which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods classical and modern in comprehensive readable volumes **EuroKarst 2016, Neuchâtel** Philippe Renard, Catherine Bertrand, 2017-01-03 This book presents the latest advances in the field of karst hydrogeology and carbonate reservoirs These include but are not limited to geomorphology of karst flow and solute transport in karst innovative metrology modelling speleogenesis and geology of carbonate reservoirs deep reservoir exploration and production water management and protection in karst environments contaminant migration and chemical behavior hydrochemistry and regional aquifer studies EuroKarst offers a platform for professional exchanges between field practitioners and academic researchers It is the European biennial conference on the hydrogeology of karst and carbonate reservoirs It is organized every two years by the Universities of Neuchâtel Switzerland Besançon France and Malaga Spain *Geosynthetics for Development of Transportation Infrastructures* Sujit Kumar Dash, Castorina Silva Vieira, 2021-05-05 *Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data-based Methods* Faming Huang, Jinsong Huang, Wei Chen, Jinquan Liu, 2022-10-07 *Annual Report* South Africa. Mitchell, Kenichi Soga, Catherine O'Sullivan, 2025-08-12 Authoritative and generously illustrated resource covering the many properties of soil and its behavior needed for addressing geotechnical and geoenvironmental engineering projects and problems The Fourth Edition of *Fundamentals of Soil Behavior* has been thoroughly updated to provide the latest information on the physical properties of soil and the fundamentals of its behavior with hundreds of tables and graphs illustrating correlations among composition classification state and static and dynamic properties Overall each topic is addressed in a micro to macro sequence considering behaviors at the atomic and or particle scales to develop understanding of soil properties and behaviors at the macro scale which is relevant to engineering practice This Fourth Edition includes two new chapters on special features of soil behavior and temperature dependent soil behavior Other chapters have been substantially updated to include the latest developments in imaging technology and analysis numerical simulations that have advanced research on the complexities of soil behavior and recent experimental data The content has been reviewed consolidated and reorganized

to more effectively communicate key information The text features end of chapter questions and problems to aid in seamless reader comprehension and information retention Updated by true thought leaders in the field the Fourth Edition of Fundamentals of Soil Behavior includes detailed information on Soil formation covering the earth s crust the geologic cycle rock and mineral stability weathering and origin of clay minerals and genesis Soil mineralogy covering atomic structure interatomic bonding secondary bonds crystal notation and clay mineral characteristics Fundamental engineering characterization of soil covering granular soils and clay minerals Observing and quantifying soil fabric covering qualitative and quantitative assessment of soil fabric Transport of heat fluid and electrical current The fundamentals of volume change deformation and strength properties of soils The impact of time and temperature changes on soil behavior Providing an understanding of soil behavior a fundamental requisite to a wide variety of engineering applications including foundation design and construction earthwork construction and geotechnical engineering Fundamentals of Soil Behavior is an essential learning resource for geotechnical and geoenvironmental engineers geologists geophysicists and students studying geotechnical engineering and granular materials

Prosecuting International Crimes: A Multidisciplinary Approach

Bartłomiej Krzan, 2016-07-11 The volume edited by Bartłomiej Krzan offers different perspectives on the prosecution of international crimes The analyses contained therein reflect different backgrounds mainly legal combining several disciplines and making it a multidisciplinary study The main but definitely not the exclusive point of reference is that of international law In addition other perspectives those of legal history or sociology of law and obviously the one of criminal law both substantive and procedural provide useful alternatives or in most occasions complementary approaches to the examination of the prosecution of international crimes The book combines different views backgrounds and underlying assumptions But gathered together they it is to be hoped shed some additional useful light that might be helpful for identifying new dimensions of the reaction judicial or other towards international crimes Contributors Władysław Czapliński Patrycja Grzebyk Witold Jakimko Wojciech Jasiński David Kohout Karolina Kremens Bartłomiej Krzan Krzysztof Maso Neringa Mickevičiūtė Robert Uerpmann Wittzack Regina Valutytė Karolina Wierczyńska Joachim Wolf Loammi Wolf and Justinas ilinskas

Resilient, Sustainable and Smart Ballasted Railway Track Yunlong Guo, Guoqing Jing, 2025-07-01 Resilient Sustainable and Smart Ballasted Railway Track explores the optimization of railway ballast tracks to achieve resilience sustainability and intelligence in railway infrastructure It summarizes and examines new technologies and developments that address unresolved rapid defects in track components such as rail damage track stability ballast flight and ballast fouling This book discusses the application of innovative materials derived from waste and recycled railway components including derived aggregates recycled ballast Neoballast and polyurethane often referred to as ballast glue This book examines state of the art structural health monitoring techniques such as smart sleepers interferometric synthetic aperture radar ground penetrating radar and inspection robots Includes research methodologies and directions for optimizing track structure applying new

materials and incorporating new AI and inspection technologies Covers the basic principles and technologies of railway structures to enhance an understanding of railway engineering Provides information on railway asset management and solutions for railway infrastructure issues for the industry railway managers and other stakeholders **Influence of Fine Particles on the Liquefaction Properties of a Reference Sand** Zhehao Zhu,2023-02-11 Over the past thirty years the liquefaction of sand containing a small amount of fine particles has become an engaging topic in the geotechnical community Indeed a great variety of field investigations revealed that the real liquefied soils are mainly composed of a host sand matrix and a small fraction of plastic or non plastic fines In this context several series of monotonic and cyclic triaxial tests were performed to clarify the influence of these fine particles on the development of sand liquefaction To get closer to in situ conditions 1g shaking table tests were carried out with two different sized model soil containers The first one small size was essentially used to check the reconstitution and the saturation method The second one very large size was manufactured to explore the sand liquefaction behaviour during base shaking in an almost actual engineering size To numerically reproduce the sand liquefaction behaviour the Dafalias model has been taken as an example and its input parameters were calibrated by an artificial intelligence method An in depth analysis of the proposed method was done with the elastoplastic theory

Bio-based Materials and Biotechnologies for Eco-efficient Construction F. Pacheco-Torgal,Volodymyr Ivanov,Daniel C.W. Tsang,2020-03-18 Bio based Materials and Biotechnologies for Eco efficient Construction fills a gap in the published literature discussing bio based materials and biotechnologies that are crucial for a more sustainable construction industry With comprehensive coverage and contributions from leading experts in the field the book includes sections on Bio based materials and biotechnologies for infrastructure applications Bio based materials and biotechnologies for building energy efficiency and other applications such as using biotechnology to reduce indoor air pollution for water treatment and in soil decontamination The book will be an essential reference resource for academic researchers civil engineers contractors working in construction works postgraduate students and other professionals **Reflections on the Complexities of the Covid-19 Pandemic** Shadrack B. Ramokgadi,Mbekezeli C. Mkhize,2022-12-31 This book offers an original and timeous snapshot of contemporary lines of argument from various authors in the Global South on the Covid 19 pandemic as a complex emergency at the height of the pandemic At the time of writing there were various levels of uncertainties from different countries citizens the public and private sectors industries and economies who were in disarray The book traces the origins of the Covid 19 pandemic in the province of Wuhan in China the challenges and the responses from a multiplicity of countries particularly from the Global South Of particular importance the book notes that vaccine uncertainty limiting the spread of the virus and loss of life and employment were some of the major challenges that these governments and citizens were confronted with Also the sizes of various economies lead to various challenges that the abovementioned governments shouldered The contributors shed light on various aspects related to the Covid 19 pandemic from various countries in the

Global South and include but were not limited to securitised lockdowns the use of militaries and complete closures of national and sometimes fragile economies as well as overburdened health systems These are just some dire consequences of Covid 19 on the public and private sector industries and economy The book emphasises that despite myriad challenges reported there are various lessons that can be learnt in terms of how the countries responded to the pandemic and in terms of how future pandemics can be handled Finally this is an interesting piece of work wherein contributors as a collective seek to shed light with regards to the unique perspectives from the Global South and at the same time give some guidance related to their specific areas of focus
