#9389 78mm Zoom Spotting Scope

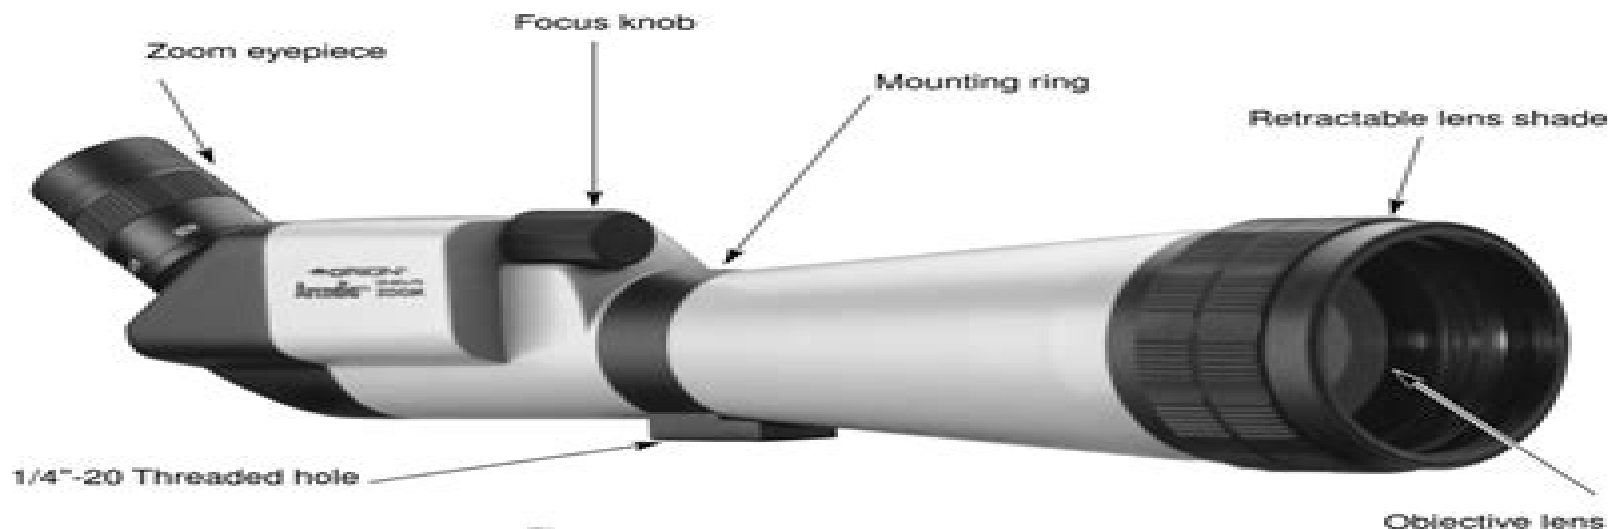

Figure 1. The Arcadia Zoom Spotting Scope

Congratulations on your purchase of a quality Orion spotting scope. Your Arcadia spotting scope is a high-quality optical instrument for viewing birds, wildlife, sports events, or anything else you want to see more closely. It will provide many years of enjoyable viewing. Before using your Arcadia spotting scope, we recommend that you read through the following instructions.

Mounting the Arcadia to a Tripod

Your Arcadia spotting scope can be attached to a sturdy camera tripod by use of the 1/4"-20 threaded hole located in the mounting ring on the spotting scope's body. This hole accepts 1/4"-20 mounting studs that are standard on most camera tripods.

By loosening the thumbscrew on the mounting ring, you will be able to rotate the spotting scope on the tripod. This is useful for getting the eyepiece into a desired position for comfortable view-

ing. Be certain to re-tighten the thumbscrew when you are at the desired position. If you wish to return the spotting scope to its normal position, simply rotate the scope until it "clicks" into place, then re-tighten the thumbscrew on the mounting ring.

Focusing the Spotting Scope

Point the spotting scope so that it is aiming in the general direction of an object at least 16 feet away. Turn the focus knob (Figure 1) with your fingers until the object comes into sharp focus. Make certain that you are turning the focus knob and not turning the zoom eyepiece. Go a little bit beyond sharp focus until the image just starts to blur again, then reverse the rotation of the knob, just to make sure you've hit the exact focus point.

Using the Zoom Eyepiece

The Arcadia spotting scope provides a continuous zoom from 20x to 60x. The magnification is adjusted to the desired level by rotating rubber grip on the zoom eyepiece. The arrow indicator

spectrograph that can be used to learn more about spectroscopy The third is a newcomer the ALPY 600 spectrograph The fourth spectrograph considered is at the other end of the market both in performance and cost the high resolution Lhires III While considerably more expensive this is a popular and excellent scientific instrument that allows more advanced amateur astronomers to produce scientifically valuable data With all of these tools in place the amateur astronomer is well prepared to forger deeper into the night sky using spectroscopy *Star & Sky* ,1980 **Star Ware** Philip S.
