Way Station Clifford D Simak:

Way Station Clifford D. Simak, 1979 Neighbors saw Enoch Wallace as an ageless hermit striding across his untended farm as he had done for over a century still carrying the gun with which he had served in the Civil War They must never know that inside his unchanging house he met and conversed with a host of unimaginable friends from the farthest stars More than a hundred years before an alien being named Ulysses had recruited Enoch as the keeper of Earth's only galactic transfer station Now Enoch studied the progress of Earth as he tended the tanks where the aliens appeared and the charts he made indicated that his world was doomed to destruction His alien friends could only offer help that seemed worse than the dreaded disaster Then he discovered the horror that lived across the galaxy

The Right to See with Technology Marc Jonathan Blitz, 2025-09-01 This book asks if we have a constitutional right to see or sense our surroundings with technology Do we have a constitutional right to record our surroundings with cameras embedded in smartphones or drones Or to enhance our vision with extended reality technology bionic eyes or brain computer interfaces Courts in the United States have already provided a possible foundation for answering such questions There is they have said a right to document matters of public concern by creating and sharing recordings with others Such recordings extend our perception They let us watch events that are remote in space and time Yet sharing them is also a kind of communication and thus the creation of speech protected by the First Amendment So too might be other ways of seeing with technology This emerging case law raises interesting questions and challenges such as how enhancement of our perceptions can leave room for others privacy This book explores such questions focusing on American constitutional jurisprudence It also argues that in doing so it is helpful to recognize that our interest in using and enhancing our perceptual power isn't only an interest in doing so as part of First Amendment communication It is also linked closely to other rights to personal integrity and the liberty to use our body's perceptual powers and to the constitution's protection for freedom of thought or what some scholars call cognitive liberty Our exercise of perception and our use of it to learn about our surroundings is a crucial part of exercising our and shaping our mind
