TYPES OF SNORERS

Mouth Shut Snorer

May indicate a problem with your tongue and nasal passageways.

2

Mouth Wide Open Snorer

Could be an indication that the tissues in your throat are more likely to be causing you to snore. If your throat is partially obstructed, you're apt to try to force in more air which creates the snore sounds.

3

Back Snorer

Causes you to breathe through your mouth. This can making snoring worse.

4

A Snorer No Matter What

Could be a sign of a more serious problem, such as sleep apnea. Visit your doctor if your snoring is loud enough to keep your partner awake, you wake yourself up, everything you have tried does not seem to help or you snore in any sleeping position.
