Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives **Global guidance framework for the responsible use of the life sciences** ,2022-09-13 The framework aims to provide global perspectives on principles tools and mechanisms to support Member States and relevant stakeholders to mitigate and prevent biorisks and govern dual use research The framework adopts the One health approach and focuses on the role that responsible life sciences research can play in preventing and mitigating risks caused by accidents inadvertent or deliberate misuse with the intention to cause harm to humans nonhuman animals plants and agriculture and the environment The framework is primarily intended for those who have responsibilities in the governance of biorisks such as policy makers and regulators in charge of developing national policies to harness the potential benefits of the life sciences while constraining their risks The framework is also directed towards scientists and research institutions educators trainers project management staff funding bodies publishers editors the private sector and all relevant stakeholders that are part of the research life cycle The governance of biorisks is an issue that should engage all countries although countries will have different contexts needs and starting points Mitigating these risks will require individual and collective actions among different stakeholders and disciplines Mitigating biorisks and governing dual use research is a shared responsibility *Ethics and Integrity in Health and Life Sciences Research* Zvonimir Koporc, 2018-12-06 This important volume covers ethics and integrity in health and life sciences research It addresses concerns in gene editing dual use and misuse of biotechnologies big data and nutritional science in health and medicine and covers attempts at ensuring ethical practices in such fields are shared internationally **Governance of Dual Use Research in the Life Sciences** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, 2018-12-26 Continuing advances in science and technology offer the promise of providing tools to meet global challenges in health agriculture the environment and economic development some of the benefits are already being realized

However such advances have the potential to challenge the oversight systems for responsible conduct of life sciences research with dual use potential research that may have beneficial applications but that also could be misused to cause harm

Between June 10 and 13 2018 more than 70 participants from 30 different countries and 5 international organizations took part in an international workshop The Governance of Dual Use Research in the Life Sciences Advancing Global Consensus on Research Oversight to promote global dialogue and increased common understandings of the essential elements of governance for such research Hosted by the Croatian Academy of Sciences and Arts in Zagreb Croatia the workshop was a collaboration among the InterAcademy Partnership the Croatian Academy the Croatian Society for Biosafety and Biosecurity and the U S National Academies of Sciences Engineering and Medicine This publication summarizes the presentations and discussions from the workshop
