Only the Longest Threads Tasneem Zehra Husain, 2014-10-29 Part fiction part overview of Aha moments in the forward march of physics Only the Longest Threads takes readers dramatically through scientific fields such as quantum field theory electromagnetism relativity quantum mechanics and string theory Each idea or concept is explored in an inventive chapter each told from a different first person narrator the faux emails letters and diary entries take place from 1728 to the present day Boing Boing The Best Books for Nerds from 2014 Science is done by real human beings with human concerns Only the Longest Threads tells a story that conveys the human side of science in a way that is as moving as it is accurate Sean Carroll theoretical physicist at Caltech and author of *The Particle at the End of the Universe* Only the Longest Threads will thrill readers with its dramatic and lucid accounts of the great breakthroughs in the history of physics classical mechanics electromagnetism relativity quantum mechanics quantum field theory and string theory each from the viewpoint of a fictional witness to the events Tasneem Zehra Husain re imagines the pivotal moments in the history of physics when radical new theories shifted our perception of the universe and our place in it Husain immerses the reader in the immediacy and excitement of the discoveries and she guides us as we begin to understand the underlying science and to grasp the revolutionary step forward each of these milestones represents Tasneem Zehra Husain writes lyrically poetically about life love and physics I highly recommend this wonderful book for anyone interested in what physics and indeed all of science is about She masterfully describes the most momentous moments in physics history with verve and talent Amir D Aczel bestselling author of *Fermat's Last Theorem* A delightful meditation on the development of modern physics culminating in the discovery of the Higgs Husain follows the thread of its creation through a dialog between a journalist and young theory student and as seen through the eyes of witnesses John Huth Donner Professor of Science Harvard University Well written and cleverly constructed this book takes us on a journey through the history of physics as a series of fictional adventures loosely linked by another fiction the storytellers emails to each other Some books are praised because I couldn't put it down but this one merits a deeper reading one that stops muses on and savors each story before going on to the next Each one captures not only the emergence of a significant idea in physics but also something of the characters culture and times surrounding that development So take your time pause to ponder but persevere you will be well rewarded Helen R Quinn Physicist Science Educator and co author of *The Mystery of the Missing Antimatter* Professor Emeritus SLAC National Accelerator Laboratory How do theoretical physicists think Tasneem Zehra Husain knows She knows their purpose feels their passions articulates their frustrations shares their triumphs Through the device of fiction Only the Longest Threads communicates the history of physical thought its roots in inquisitiveness and essential disinterest in outcome with greater clarity than any popular science text Michael Duff FRS Abdus Salam Professor of Theoretical Physics Imperial College London An artfully constructed journey through space and time Freddy Cachazo Perimeter Institute for Theoretical Physics

Husain skillfully weaves a poetic tapestry Joseph Mazur author of Enlightening Symbols **Failure Mapping** Daniel T. Daley, 2009 Designed to be easy to read and perfect for busy people who have little time this unique book provides an introduction to the new concept of Failure Mapping by comparing typical functions in an organization which benefits from Failure Mapping to one without Through examples it shows how individuals in different roles can have their effectiveness enhanced by having access to historical Failure Maps describing past failures While few of the individual concepts are new the approach described ties established concepts together in a new and comprehensive manner This resource describes the process used to create Failure Maps that connect Malfunction Reports Function Behavior with Failure Modes Component Condition to help users clearly understand the most likely final disposition based only on the initial report and the statistics produced by historical experience It is sure to be found useful by novice Reliability Engineers Maintenance and Reliability Managers Engineering Managers Plant and Corporate Senior Staff and Executives looking for ways to enhance performance and Consultants who may want to enrich their portfolio by adding this tool Features Describes issues that are particularly important to creating Failure Maps that record failure histories in a manner that the records will be useful in the future Explains how Failure Maps can be used to improve reliability by identifying Failure Mechanisms while at work Details how Failure Maps can be used to improve reliability by identifying Defects before failures can occur Describes how Failure Maps can be used to increase the effectiveness of the diagnostic and troubleshooting process as a part of any help desk activity Explains how to use Failure Mapping as a tool to improve the effectiveness of triage as a part of failure response in high volume activities Includes several forms found useful in recording Failure Maps and creating reports Provides readers with tools needed to enhance and set up their own Failure Mapping program Offers both new and more experienced plant and shop personnel with a tool they can use to develop a consistent understanding of Failure Mapping the roles in a Failure Mapping organization and the steps in implementing a Failure Mapping process **Newton: Kosmos, Bios, Logos** Irena Štěpánová, 2014-09-01 Irena Štěpánová in this book explores Isaac Newton's engagement with ancient wisdom the Hexameral tradition Hermeticism theology alchemy as well as natural philosophy In so doing she brings together the established historiography with her own new insights Štěpánová's study is more than a study of Newton's thought for it contains a good deal of background on ancient e.g. Hermeticism and early modern thought e.g. the Cambridge Platonists She also uses the interpretative lenses of several contemporary Newton and non-Newton scholars in her work Moreover provides helpful summaries of Newton's thought e.g. his theology Štěpánová has provided Newton scholarship a great service in this book not only by making her Czech language work available in English but bringing to the English language reader learning on Hebraic thought philosophy of life and Hermeticism originally published in Czech Abstract from the review by Stephen David Snobelen Associate Professor History of Science and Technology Programme University of King's College Halifax Nova Scotia Canada and Director of Newton Project Canada *Empirical Paradox, Complexity Thinking and Generating New Kinds of*

Knowledge Paolo Grigolini, Korosh Mahmoodi, Bruce J. West, 2019-06-05 Is another world war inevitable The answer is a resounding yes if we continue to think in terms of either or outcomes Adversaries think in such terms you either get what you want or you do not Can a different way of thinking produce a different outcome This book shows that the consistency demanded by the linear logical either or thinking is disrupted by paradox whose resolution forces a consequent decision war or peace with no middle ground If this were the only way of thinking then a person would be either a protagonist or an antagonist but a person can be both either or neither this opens the door to novel solutions This is both and thinking which the book shows can be achieved by a dynamic resolution of paradox Thus a basically selfish individual can also be a hero a consequence of the complexity of being human *Questioning the Foundations of Physics* Anthony Aguirre, Brendan Foster, Zeeya Merali, 2015-01-24 The essays in this book look at way in which the fundamentals of physics might need to be changed in order to make progress towards a unified theory They are based on the prize winning essays submitted to the FQXi essay competition Which of Our Basic Physical Assumptions Are Wrong which drew over 270 entries As Nobel Laureate physicist Philip W Anderson realized the key to understanding nature s reality is not anything magical but the right attitude the focus on asking the right questions the willingness to try and to discard unconventional answers the sensitive ear for phoniness self deception bombast and conventional but unproven assumptions The authors of the eighteen prize winning essays have where necessary adapted their essays for the present volume so as to a incorporate the community feedback generated in the online discussion of the essays b add new material that has come to light since their completion and c to ensure accessibility to a broad audience of readers with a basic grounding in physics The Foundational Questions Institute FQXi catalyzes supports and disseminates research on questions at the foundations of physics and cosmology particularly new frontiers and innovative ideas integral to a deep understanding of reality but unlikely to be supported by conventional funding sources **Allah's Universe** Iftikhar Uddin Hyder, 2025-06-16 Allah s Universe Why God is the Only Explanation for Our Existence is intended to demonstrate that the universe was almost certainly created by God This book is intended for individuals who in order to understand the universe and everything it encapsulates rely on science but in understanding the universe they do not irrationally dismiss the existence of God and His infinite creative power Allah s Universe shows that the universe has been created with laws of nature which are fine tuned to support life as we know it even if intelligent life in it may have an ephemeral existence as compared to its age There are simply too many improbable coincidences which make the universe conducive for life to exist If some of the laws of nature were even slightly different life would not exist This book also attempts to briefly explore the greatest miracle in the universe life About the Author Iftikhar Uddin Hyder is a cosmology aficionado He has published articles on different topics including cosmology and finance He works as a finance professional and lives in New Jersey His professional publications on finance have been cited by researchers at academic institutions and regulatory bodies in North America South America Europe and Asia **The Last Economy** Emad Mostaque, 2025-08-22
