- 

**Gizmo Warm-up**

The *Density Laboratory* Gizmo™ allows you to measure a variety of objects, then drop them in water (or other liquid) to see if they sink or float.

1. An object's **mass** is the amount of **matter** it contains. The mass of an object can be measured with a calibrated **scale** like the one shown in the Gizmo. Drag the first object onto the **Scale**. (This is object 1.)

What is the mass of object 1? \_\_\_\_\_

2. An object's **volume** is the amount of space it takes up. The volume of an irregular object can be measured by how much water it displaces in a **graduated cylinder**. Place object 1 into the **Graduated Cylinder**.

What is the volume of object 1? \_\_\_\_\_

Note: While milliliters (mL) are used to measure liquid volumes, the equivalent unit cubic centimeters ( $\text{cm}^3$ ) are used for solids. Therefore, write the volume of object 1 in  $\text{cm}^3$ .

3. Drag object 1 into the **Beaker of Liquid**. Does it sink or float? \_\_\_\_\_

*Teaching and Learning Online* Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments.

Molnar et al 2021 Seaman et al 2018 This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy Brigido Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation

### **The Explore-Before-Explain Guidebook for Science Education**

Patrick Brown, 2025-06-30 This guidebook uses an Explore before Explain instructional sequence to help you facilitate the design of active meaning making lessons in science. Author Pat Brown models and breaks down how an Explore before Explain approach ensures students conceptual understandings are constructed primarily on evidence based experiences in the classroom. From prompting students to ponder patterns helping them identify cause and effect relationships to focusing on development of their thinking rather than validating ideas you can use Explore before Explain instruction to help your students feel confident in their thinking and become more self directed learners. Chapters focus on developing your students conceptual science understanding through the investigation of natural occurrences. Content and module examples are provided as well as attention to contemporary standards and safety in science. Rather than acting as a prescriptive program however this book adds another element to your curriculum design showing how lessons can and should include critical elements of active sensemaking when designing an Explore before Explain sequence. In addition the author shows the benefits of bringing Explore before Explain outside the classroom to create high quality professional and curriculum based learning. This resource is ideal for K-12 science teachers as well as building administrators who are looking for a practice oriented and research based approach for their science curriculum. As a classroom educator you can use these strategies for leveraging research into hands on minds on activities to promote more robust and equitable learning environments. For leaders this resource can be used to develop professional learning experiences for sustained departmental improvement.

*Assessing Science Learning* Janet Coffey, Rowena Douglas, Carole Stearns, 2008 In addressing assessment as a central

element of teaching practice Assessing Science Learning explores the various forms assessment can take The research projects described show the strong link between assessment and improved student learning The essays invite science teachers to reflect on their practices and priorities and to consider a variety of productive assessment strategies and frameworks
