Applied

Linguistics and Primary School Teaching Sue Ellis, Elspeth McCartney, 2011-04-07 Modern primary teachers must adapt literacy programmes and ensure efficient learning for all. They must also support children with language and literacy difficulties, children learning English as an additional language and possibly teach a modern foreign language. To do this effectively they need to understand the applied linguistics research that underpins so many different areas of the language and literacy curriculum. This book illustrates the impact of applied linguistics on curriculum frameworks and pedagogy. It captures the range of applied linguistics knowledge that teachers need and illustrates how this is framed and is used by policy makers, researchers, teacher educators and the other professions who work with teachers in schools. It considers how to effect professional development that works. It is essential reading for primary teachers but also for speech and language therapists, educational psychologists, learning support teachers and all those doing language or literacy research in the primary classroom.

Reading Across International Boundaries Roger Openshaw, Janet Soler, 2007-06-01 *Reading Across International Boundaries* edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading. It sets the educational issues firmly in the context of the social, cultural and political dynamics that inform and animate them and give them their meaning. It does so by setting out to understand their historical and comparative dimensions. Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar. The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world. More than this, however, this collection takes us into the realm of international influences. It underlines how debates in

this area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly Most of all it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it should surely be
