Equipment for Respiratory Care Teresa A. Volsko, Robert L. Chatburn, Mohamad F. El-Khatib, 2020-11-24 *Equipment for Respiratory Care* Second Edition continues to break the archetype of equipment texts. This text uniquely focuses on the principles of the equipment in a practical, clinically relevant manner. **AMA Manual of Style** The JAMA Network Editors, 2019-11-01 The AMA Manual of Style is a must-have resource for anyone involved in medical health and scientific publishing. Written by an expert committee of JAMA Network editors, this latest edition addresses issues that face authors, editors, and publishers in the digital age. Extensive updates are included in the References chapter with examples of how to cite digital publications, preprints, databases, data repositories, podcasts, apps, and interactive games and social media. Full-color examples grace the chapter on data display with newer types of graphic presentations and updated guidance on formatting tables and figures. The manual thoroughly covers ethical and legal issues such as authorship, conflicts of interest, scientific misconduct, intellectual property, open access, and public access and corrections. The Usage chapter has been revised to bring the manual up to date on word choice, especially in writing about individuals with diseases or conditions and from various socioeconomic, racial, ethnic, and sexual orientation populations. Specific nomenclature entries in many disciplines are presented to guide users in issues of diction, formatting, and preferred terminology. Guidance on numbers, SI units, and math has been updated, and the section on statistics and study design has undergone a major expansion. In sum, the answer to nearly any issue facing a writer or editor in medicine, health care, and related disciplines can be found in the 11th edition of the AMA Manual of Style. Available for institutional purchase or subscription or individual subscription.
