People and a Nation Roy Blount (Jr),1999 **Detroit** Scott Martelle,2014-03-01 Detroit was established as a French settlement three quarters of a century before the founding of this nation A remote outpost built to protect trapping interests it grew as agriculture expanded on the new frontier Its industry took a great leap forward with the completion of the Erie Canal which opened up the Great Lakes to the East Coast Surrounded by untapped natural resources Detroit turned iron

from the Mesabi Range into stoves and railcars and eventually cars by the millions This vibrant commercial hub attracted businessmen and labor organizers European immigrants and African Americans from the rural South At its mid 20th century heyday one in six American jobs were connected to the auto industry its epicenter in Detroit And then the bottom fell out Detroit A Biography takes a long unflinching look at the evolution of one of America s great cities and one of the nation s greatest urban failures It tells how the city grew to become the heart of American industry and how its utter collapse from 1 8 million residents in 1950 to 714 000 only six decades later resulted from a confluence of public policies private industry decisions and deep thick seams of racism And it raises the question when we look at modern day Detroit are we looking at the ghost of America s industrial past or its future **United States History Video Collection Guidebook** ,1998 **AP® U.S. History Crash Course Book + Online** Larry Krieger,2017-02-28 AP U S History Crash Course A Higher Score in Less Time 4th Edition Fully Aligned with the Latest Exam Framework REA s AP U S History Crash Course is the top choice for the last minute studier or any APUSH student who wants a quick refresher on the course Are you crunched for time Have you started studying for your Advanced Placement U S History exam yet How will you memorize everything you need to know before the test Do you wish there was a fast and easy way to study for the exam AND boost your score If this sounds like you don t panic REA s Crash Course for AP U S History is just what you need Our Crash Course gives you Targeted Focused Review Study Only What You Need to Know Our all new fourth edition addresses all the latest test revisions which took effect in 2016 including the full range of special AP question types including comparison causation patterns of continuity and synthesis prompts which require test takers to make connections between historical periods issues and themes A People and a Nation Study Guide, Volume 2, Fifth Edition Norton,1998-12 **Golden Fetters** Barry Eichengreen,1992-05-07 This book offers a reassessment of the international monetary problems that led to the global economic crisis of the 1930s It explores the connections between the gold standard the framework regulating international monetary affairs until 1931 and the Great Depression that broke out in 1929 Eichengreen shows how economic policies in conjunction with the imbalances created by World War I gave rise to the global crisis of the 1930s He demonstrates that the gold standard fundamentally constrained the economic policies that were pursued and that it was largely responsible for creating the unstable economic environment on which those policies acted The book also provides a valuable perspective on the economic policies of the post World War II period and their consequences *The Artificial Paradise* Sharona Ben-Tov,Sharona Muir,1995 Why do Americans find it appealing to create and live in artificial worlds whether in space at Disneyland in computer networks or in our own minds The Condition of Digitality Robert Hassan,2020-01-10 David Harvey s The Condition of Postmodernity rationalised capitalism s transformation during an extraordinary year 1989 It gave theoretical expression to a material and cultural reality that was just then getting properly started globalisation and postmodernity whilst highlighting the geo spatial limits to accumulation imposed by our planet However this landmark publication author Robert Hassan argues did not

address the arrival of digital technology the quantum leap represented by the move from an analogue world to a digital economy and the rapid creation of a global networked society Considering first the contexts of 1989 and Harvey's work then the idea of humans as analogue beings he argues this arising new human condition of digitality leads to alienation not only from technology but also the environment This condition he suggests is not an ideology of time and space but a reality stressing that Harvey's time space compression takes on new features including those of outward and inward globalisation and the commodification of all spheres of existence Lastly the author considers culture's role drawing on Rahel Jaeggi's theories to make the case for a post modern Marxism attuned to the most significant issue of our age Stimulating and theoretically wide ranging *The Condition of Digitality* recognises post modernity's radical new form as a reality and the urgent need to assert more democratic control over digitality

American Covenant Philip Gorski, 2019-06-25 The long battle between exclusionary and inclusive versions of the American story Was America founded as a Christian nation or a secular democracy Neither argues Philip Gorski in *American Covenant* What the founders envisioned was a prophetic republic that would weave together the ethical vision of the Hebrew prophets and the Western political heritage of civic republicanism In this eye opening book Gorski shows why this civil religious tradition is now in peril and with it the American experiment *American Covenant* traces the history of prophetic republicanism from the Puritan era to today providing insightful portraits of figures ranging from John Winthrop and W E B Du Bois to Jerry Falwell Ronald Reagan and Barack Obama Featuring a new preface by the author this incisive book demonstrates how half a century of culture war has drowned out the quieter voices of the vital center and demonstrates that if we are to rebuild that center we must recover the civil religious tradition on which the republic was founded
