The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Destination London Andrew Smith, Anne Graham, 2019-05-21 London is one of the world's most popular

destinations and visitors contribute approximately 14.9 billion of expenditure to the city every year. Its tourism and events sectors are growing and over the last few years London has received more visitors than ever before. However, detailed accounts of the city's visitor economy are conspicuously absent. This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces. The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze with tourism spreading beyond established central zones into peripheral suburban and residential areas in part propelled by a big rise in peer to peer accommodation use. Simultaneously London's airports and sports stadiums and their surrounds are becoming destinations in their own right. New vantage points have been created allowing tourists to explore the city from above at night time or through tours given by the homeless via the opening up of the River Thames or through the transformation of local parks into eventscapes. The book explores these trends and shows how urban destinations expand. In doing so it enhances our understanding of London and highlights the growing significance of tourism and events in global cities.

The Desecularisation of the City David Goodhew, Anthony-Paul Cooper, 2018-09-21 Major cities have long been seen as centres of secularisation. However, the number of congregations in London grew by 50% between 1979 and the present. London's churches have been characterised more by growth than by decline in the decades since 1980. *The Desecularisation of the City* provides the first academic survey of churches in London over recent decades, linking them to similar developments in other major cities across the West. Produced by a large team of scholars from a range of disciplines, this volume offers a striking and original portrait of congregational life in London since 1980. Seventeen chapters explore the diverse localities, ethnicities and denominations that make up the church in contemporary London. The vitality of London's churches in the last four decades shows that secularisation is far from inevitable in the cities of the future. This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West, which has mostly depicted cities as secular spaces within a secularising culture. It will be of great interest to scholars working across a wide range of disciplines including history, sociology, religious studies and theology.
