Statistics Catalog 2005 Neil Thomson,2004-09 Teaching Virtue and Practical Reason Amy D. Gossett,2004 This dissertation constructs an Aristotelian model of civic education and explores the degree to which all schools may employ these principles Much of today s educational debate centers on the inadequacy of public schools for providing the tools necessary for individual achievement or societal cohesion Recent violence on school campuses has only exacerbated these perceptions My project seeks to improve so called values education dialogue by avoiding the political left s problem of

relativism and the political right's imposition of religious dogma I utilize Aristotle's Politics Nicomachean Ethics and Eudemian Ethics to develop a framework for civic education that stresses the teaching of virtuous behaviors and practical reason This model is then used to stimulate critical self reflection of our schooling processes and highlight possible areas of success and failure The model becomes the lens through which I interpret what some classes are doing to civically engage students I observed many learning episodes in a variety of classroom settings secular and non secular public and private and both untracked and Advanced Placement courses The Aristotelian model helps create an explicit self awareness of civic teaching methods that otherwise may be overlooked or under utilized in classrooms By illuminating and emphasizing these strategies they may be more consciously and consistently applied throughout the curriculum By using a new framework I seek to move research beyond simply recording the deficiencies of public schools toward reproducing the strengths of all schools
