Facility Design Stephan A. Konz, 1985. **Efficiency and Innovation in Logistics** Uwe Clausen, Michael ten Hompel, J. Fabian Meier, 2013-08-16. The importance of logistics in all its variations is still increasing. New technologies emerge, new planning methods and algorithms are developed only to face a market with a growing complexity and the need of weighting monetary costs against ecological impact. Mastering these challenges requires a scientific viewpoint on logistics but always with applications in mind. This volume presents up to date logistics research in all its diversity and interconnectedness. It grew out of the International Logistics Science Conference ILSC held in Dortmund in September 2013, bringing together leading

scientists and young academics from nine different countries The conference was jointly organized by the Efficiency Cluster Logistics and the Fraunhofer Institute for Material Flow and Logistics The Program Committee used a double blind review process to choose the 12 strongest contributions which were then grouped in four areas Sustainability logistics including electric mobility smart information communication technologies and corporate social responsibility management Intralogistics including the detection of autonomous vehicles 3D computer vision and sensor functions for forklift trucks Transport logistics including distribution centre organization delivery performance in railway systems and logistics reference modelling Logistics facilities including environmental impact of container ports parcel sorting systems and model based systems engineering

Distribution Logistics Bernhard Fleischmann, Andreas Klose, 2004-08-25 The complexity of distribution systems is augmented by various trends globalization of the manufacturing industry rising customer demands and the reverse flows within closed loop systems In this light the need for advanced planning methods that are based on quantitative optimization is constantly increasing This book takes up the challenges posed by these developments In doing so it presents recent results and case studies from a group of researchers that regularly meet at the IWDL International Workshop on Distribution Logistics The text covers the design of distribution networks vehicle routing warehousing and reverse logistics It also contains a comprehensive review of more than 60 case studies in reverse logistics
