Imaging Xiaoyue Zhou, Rob J. Van Der Geest, Yucheng Chen, Peng Hu, Ming Yen Ng, 2024-08-28 In the past decades advanced quantitative indexes obtained by cardiovascular magnetic resonance imaging CMRI such as myocardial strain myocardial T1 ECV T2 T2 relaxation value myocardial blood flow quantification index and hemodynamics indexes have been proposed as an alternative for non invasive quantitative evaluation in various cardiovascular diseases Those quantitative indexes have been proven to be more sensitive in assessing the early change of myocardial tissue ventricular function or hemodynamics compared to the conventional qualitative methods However there are many challenges in the accurate measurement of those indexes as well as the evaluation of their clinical significance in the diagnosis and prognosis of a certain disease Besides quality control and standardization of those indexes become crucial when promoting them into clinical practice This Research Topic will offer comprehensive reviews and original research articles of the newly emerged quantitative CMRI methods and the clinical insights of the diagnostic and prognostic value of those advanced CMRI indexes CMRI techniques such as myocardial strain analysis quantitative myocardial tissue mapping 2 dimensional 4 dimensional flow quantification and quantitative perfusion will be of our interest The aim of this Research Topic will be to highlight the promising technical improvements in the accurate measurement of the CMRI indexes and or the added value of those indexes in disease diagnosis and prognosis Meanwhile quality control and standardization of the advanced CMRI indexes in multi centre multi

Dynamic Functional Connectivity in Neuropsychiatric Disorders: Methods and Applications, volume II Zaicu Cui, Feng Liu, Wenbin Guo, Yuqi Cheng, Zhifen Liu, 2023-06-07 Neuropsychiatric disorders have a huge impact on individuals families and societies However the neuropathology underlying cognitive deficits in neuropsychiatric disorders remains unclear Resting state functional connectivity provides a powerful way to investigate functional alterations underlying cognitive deficits in neuropsychiatric disorders Traditional FC analysis measures the correlations of signals with an assumption that functional connectivity remains constant during the observation period In recent years several studies have demonstrated the feasibility of dynamic methods in characterization of functional brain changes such as dynamic functional connectivity investigated by a sliding window method However selection of window size window stepsize and window type are open areas of research and an important parameter to capture the resting state FC dynamics

The Columbia Guide to

Basic Elements of Eye Care Daniel S. Casper, George A. Cioffi, 2019-07-01 This unique resource is a practical easy to use guide for the non ophthalmologist healthcare provider as they encounter patients with eye complaints and other concerning ophthalmic conditions The Columbia Guide to Basic Elements of Eye Care is specifically designed with the non ophthalmologist in mind and provides a foundation of basic eye anatomy and physiology functional analysis pathology and concepts in eye care Each chapter delivers an accessible summary of various ophthalmic diseases and conditions all of which are frequently encountered in everyday practice These chapters provide in depth discussions on a wide range of topics from testing and examination procedures to management protocols referral guidelines and expected frequency of follow up for each disorder Complete with hundreds of high quality descriptive illustrations and clinical photographs The Columbia Guide to Basic Elements of Eye Care presents clear understandable explanations of basic eye anatomy physiology disease and treatment for non ophthalmic practitioners and students In doing so this guide provides a framework for determining the normal versus the abnormal helping the reader recognize which patients require referral and identify which conditions are developing require urgent treatment or can be routinely followed Non ophthalmologist healthcare providers and students alike will find this book written by leaders in the field a practical resource to consult as they encounter patients with treatable but potentially sight threatening conditions
