Nursing Informatics 2016 W. Sermeus,P.M. Procter,P. Weber,2016-07-21 As the importance of electronic and digital devices in the provision of healthcare increases so does the need for interdisciplinary collaboration to make the most of the new technical possibilities which have become available This book presents the proceedings of the 13th International Conference on Nursing Informatics held in Geneva

Switzerland in June 2016 This biennial international conference provides one of the most important opportunities for healthcare professionals from around the world to gather and exchange expertise in the research and practice of both basic and applied nursing informatics The theme of this 13th conference is eHealth for All Every Level Collaboration From Project to Realization The book includes all full papers as well as workshops panels and poster summaries from the conference Subjects covered include a wide range of topics from robotic assistance in managing medication to intelligent wardrobes and from low cost wearables for fatigue and back stress management to big data analytics for optimizing work processes and the book will be of interest to all those working in the design and provision of healthcare today Implementing an Electronic Health Record System James M. Walker, Eric J. Bieber, Frank Richards, Sandra Buckley, 2006-08-07 Practical in its scope and coverage the authors have provided a tool kit for the medical professional in the often complex field of medical informatics All editors are from the Geisinger Health System which has one of the largest Electron Health systmes in the USA and is high in the list of the AMIA 100 Most Wire healthcare systems Describes the latest successes and pitfalls *Nursing Informatics* Marion J. Ball, Kathryn J. Hannah, Susan K. Newbold, Judith V. Douglas, 2000-03-30 Since publication of the first edition in 1988 this book has established itself as the premier reference text for nurses nursing administrators nursing students and other health care professionals who seek a state of the art review of the role of IT in the nursing profession The third edition of this seminal work keeps readers at the forefront of the rapidly evolving field of nursing informatics examining new trends and thoroughly updating and revising all content New chapters include Selecting a Nursing Informatics Consultant Project Management Consumer Informatics Data Mining Education CME Patient Electronic Medical Imaging Nursing Informatics Competencies Telehealth and Implications Business Process Reengineering Nursing s Role in Telehealth Electronic Fetal Monitoring Cydney Afriat Menihan, Ellen Kopel, 2007-05-29 This comprehensive text emphasizes the practical application of electronic fetal monitoring EFM Case scenarios link various clinical situations with data interpretation to promote critical thinking Relevant up to date research helps readers develop problem solving skills identify optimal treatment responses and become familiar with the disease and nondisease conditions in pregnant patients that affect fetal health More than 170 EFM strips complement the text This edition has more monitoring strips and a new chapter on electronic record keeping by a well known expert Electronic Fetal Monitoring Concepts and Applications Second Edition is a must have purchase for anyone responsible for EFM interpretation **The Future of Nursing** Institute of Medicine, Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine, 2011-02-08 The Future of Nursing explores how nurses roles responsibilities and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America s increasingly complex health system At more than 3 million in number nurses make up the single largest segment of the health care work force They also spend the greatest amount of time in delivering patient care as a profession Nurses therefore have valuable insights and unique

abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act ACA enacted this year Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States To ensure its members are well prepared the profession should institute residency training for nurses increase the percentage of nurses who attain a bachelor s degree to 80 percent by 2020 and double the number who pursue doctorates Furthermore regulatory and institutional obstacles including limits on nurses scope of practice should be removed so that the health system can reap the full benefit of nurses training skills and knowledge in patient care In this book the Institute of Medicine makes recommendations for an action oriented blueprint for the future of nursing
