K. Prahalad,Venkat Ramaswamy,2004-02-18 In this visionary book C K Prahalad and Venkat Ramaswamy explore why despite unbounded opportunities for innovation companies still can t satisfy customers and sustain profitable growth The explanation for this apparent paradox lies in recognizing the structural changes brought about by the convergence of industries and technologies ubiquitous connectivity and globalization and as a consequence the evolving role of the consumer from passive recipient to active co creator of value Managers need a new framework for value creation Increasingly individual customers interact with a network of firms and consumer communities to co create value No longer can firms autonomously create value Neither is value embedded in products and services per se Products are but an artifact around which compelling individual experiences are created As a result the focus of innovation will shift from products and services to experience environments that individuals can interact with to co construct their own experiences
