Chaste Cinematics Victor Vitanza,2015 Victor J Vitanza author of *Sexual Violence in Western Thought and Writing* continues to rethink the problem of sexual violence in cinema and how rape is often represented in chaste ways in the form of a Chaste Cinematics Vitanza continues to discuss Chaste Cinematics as participating in transdisciplinary rhetorical traditions that establish the very foundations groundings points of stasis for nation states and cultures In this offering however the initial grounding for the discussions is base materialism George Bataille divine filth the sacred and profane It is this post philosophical base materialism that destabilizes binaries fixedness and brings forth excluded thirds Vitanza asks why is it that a repressed third or a third figure returns most strangely as a product of rape and torture He works with Jean Paul Sartre and Page duBois s suggestion that the product is a new species Always attempting unorthodox ways of approaching social problems Vitanza organizes his table of contents as a DVD menu of Extras supplements This menu includes Alternate Endings and Easter Eggs as well as an Excursus which invokes readers to take up the political exigency of the DVD Book Vitanza s first Extra studies a trio of films that need to be reconsidered given what they offer as insights into Chaste Cinematics *Amadeus* a mad god *Henry Fool* a foolish god and *Multiple Maniacs* a divine god who is raped and eats excrement The second examines Helke Sander s documentary *Liberators Take Liberties* which re thinks the rapes of German women by the Russians and Allies during the Battle of Berlin The third rethinks Margie

Strosser's video film *Rape Stories* that calls for revenge. In the *Alternate Endings* Vitanza rethinks the problem of reversibility in *G No's Irreversible*. In the *Easter Eggs* he considers Dominique Laporte's *The Irreparable* as the object of loss and Giorgio Agamben's *The Irreparable* as hope in what is without remedy. The result is not another film studies book but a new genre, a new set of rhetorics for new ways of thinking about cinematics, perhaps postcinematics.

Victor J. Vitanza is Professor of English and Rhetorics and is the founding Director of the Ph.D. program in Rhetorics, Communication and Information Design in the College of Architecture, Art and Humanities at Clemson University. He is also Professor of Rhetoric and Philosophy as well as the holder of the Jean François Lyotard Chair in the Media and Communication Division at the European Graduate School in Switzerland. He is the Editor of *PRE-TEXT: A Journal of Rhetorical Theory*. His books include *Sexual Violence in Western Thought and Writing* (Chaste Rape, Palgrave, 2011), *Negation, Subjectivity and The History of Rhetoric* (SUNY, 1997), *Writing Histories of Rhetoric* (Southern Illinois, 1993) and *PRE-TEXT: A Retrospective* (Pittsburgh, 1993).

 Anthony J. Zambonini, 2006 *Forthcoming Books*
 Rose Arny, 1995 **Medical Uses of Statistics** John C. Bailar, David C. Hoaglin, 2012-01-10

A new edition of the classic guide to the use of statistics in medicine featuring examples from articles in the *New England Journal of Medicine*. *Medical Uses of Statistics* has served as one of the most influential works on the subject for physicians, physicians in training, and a myriad of healthcare experts who need a clear idea of the proper application of statistical techniques in clinical studies as well as the implications of their interpretation for clinical practice. This Third Edition maintains the focus on the critical ideas rather than the mechanics to give practitioners and students the resources they need to understand the statistical methods they encounter in modern medical literature. Bringing together contributions from more than two dozen distinguished statisticians and medical doctors, this volume stresses the underlying concepts in areas such as randomized trials, survival analysis, genetics, linear regression, meta-analysis, and risk analysis. The Third Edition includes numerous examples based on studies taken directly from the pages of the *New England Journal of Medicine*. Two added chapters on statistics in genetics. Two new chapters on the application of statistical methods to studies in epidemiology. New chapters on analyses of randomized trials, linear regression, categorical data analysis, meta-analysis, subgroup analyses, and risk analysis. Updated chapters on statistical thinking, crossover designs, p-values, survival analysis, and reporting research results. A focus on helping readers to critically interpret published results of clinical research. *Medical Uses of Statistics*, Third Edition is a valuable resource for researchers and physicians working in any health-related field. It is also an excellent supplemental book for courses on medicine, biostatistics, and clinical research at the upper undergraduate and graduate levels. You can also visit the *New England Journal of Medicine* website for related information.

Better Safe Than Sorry Michael Krepon, 2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the past Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated
