## **Take Only Pictures English Edition:**

**Take Only Pictures** Laina Villeneuve, 2014-07-10 Kristine Owens is back in the saddle to deal with unfinished business from her last summer guiding horseback tours in California's High Sierras. A dalliance with an attractive blonde biologist would be a dangerous distraction. She must stay focused on the path that leads to her independence. A summer assignment in Mammoth Lakes becomes even more attractive when Gloria Fisher crosses paths with Kristine. Playful wit, tight jeans, cowgirl boots: the sparks are real. But can they burn brighter than her lifelong career goals? Only a fool takes two things for granted: Mother Nature and the ways of a woman's heart.

Martin, Len Unsworth, 2023-08-07 This innovative volume provides a new analytic framework for understanding how meaning-making resources are deployed in images designed for knowledge building in school science. The framework enables analyses of science images from the perspectives of both their complexity and recognizability. Complexity deals with the technical and abstract knowledge of school science, technicality, evaluative dispositions in relation to that knowledge, iconization, and the condensation of the technical and dispositional meanings as synoptic eye-fuls in discipline-specific infographics aggregation. Recognizability concerns the relationship between the appearance of phenomena in reality and the reconfiguration of this reality in images: congruence, the perceptibility or discernibility of the features and contexts of phenomena in images, explicitness, and how images engage their viewers' affiliation. The framework is illustrated by more than 100 images in colour in the e-book and

black and white in the paper version and will inform research into multimodal literacy pedagogy that incorporates an understanding of the role of images in the teaching and learning of school science This book will be of particular interest to scholars in multimodality semiotics literacy education and science education      **Capturing Time & Motion** Joseph Meehan, Joseph R.
