

## **Studying Abroad: Perspectives for Students**

2 pages | 409 words

Nowadays, the number of students aiming to study abroad is increasing continually. From my point of view, more and more students want to study abroad because they want to have a better education, to acquire knowledge of new cultures and for certain to widen their perspective.

Firstly, studying abroad, students will have a better education. Nowadays, many students from developing countries like India, China... set studying in the First World countries as their short-cut way to have an international education. It is because in their countries, the education systems are still in poor condition due to financial situation and faculties. On the contrary, in United States, for example, students can live and study in a distinguished educational environment. It is not because the facilities here are up-to-date but also because of its educational mission. That is to provide student dynamic skills and knowledge that need for their future rather than to feed facts, a method that is still in use in many developing countries.

Secondly, students who study abroad can have a favorable chance to attain knowledge of new culture. Obviously, when a student for the first time studies abroad, he will be exposed to a totally new culture. Here, from people, customs, to views are different from his country. However, due to the proximity of him to the new culture, he can easily learn a lot about it by observing, living with native people or taking part in festivals, what are not existed in books, here. This will help him to have better understanding of the new country and also offer him an overall view of multicultural world he is living in.

Last but not least, studying abroad, the perspective of students is certainly broadened due to experiences they accumulated in the new countries. For example, many American students grow up with the confidence that America is the greatest and does everything best. But indeed, there are still number of astute people in other countries who are working and contributing to the development of the world. That nowadays, many colleges in the US are encouraging their students to study abroad to take a glimpse and to have a different view of other countries.

In short, I believe that better education, cultural experiences and perspective are the most important factors that all students take into consideration when they decide to study abroad as one who examines them carefully will be able to choose his best country to study in.

**Education Abroad and the Undergraduate Experience** Elizabeth Brewer, Anthony C. Ogden, 2023-07-03 Co published with This volume focuses on two questions First how can education abroad be embedded into undergraduate education so that students experience it as an integral component of their education and something they help shape rather than as time away from their education and as a commodity to be consumed Second how can colleges and universities maximize the educational value of education abroad by forging stronger connections between it and other undergraduate experiences The volume argues that learning abroad be positioned within the work of the larger institution and students overall education Organized within three sections this volume makes the case that learning abroad must be positioned within the work of the larger institution and students overall education In doing so it questions many current assumptions and stimulates thinking about the power of an integrative approach to education abroad to lead to lasting educative value An integrative approach requires that students be afforded multiple opportunities and ongoing support to draw connections with their learning abroad with other dimensions of their undergraduate education Chapters cover topics such as the additive value of integrating multiple HIPs with education abroad to span disciplinary boundaries and promote an array of soft or operational skills the importance of maintaining the disruptive quality of the encounter with the foreign to enrich study at home issues of commodification and reciprocity increasing access to study abroad to community college particularly adult populations facilitating students social and intellectual development identity

formation and reflective practice rethinking orientation programming to emphasize the continuity of learning pre during and post education abroad asking fundamental questions about the purpose of education abroad to rethink assessment and its purposes the faculty role in the internationalization of the curriculum and developing more intentional relationships with in field partners and international educational organizations to more effectively connect leaning abroad with other dimensions of undergraduate education For everyone involved in international education whether SIOs faculty department chairs or deans the critical questions and new perspectives offered here will inform and shape the growing movement to integrate education abroad with the overall undergraduate experience     Resources in Education ,1998     **Exchange of Ideas**

Adam R. Nelson,2023-12-05 The first volume of an ambitious new economic history of American higher education Exchange of Ideas launches a breathtakingly ambitious new economic history of American higher education In this volume Adam R Nelson focuses on the early republic explaining how knowledge itself became a commodity as useful ideas became salable goods and American colleges were drawn into transatlantic commercial relations American scholars might once have imagined that higher education could sit beyond the sphere of market activity that intellectual exchange could transcend vulgar consumerism but already by the end of the eighteenth century they saw how ideas could be factored into the nation s balance of trade Moreover they concluded that it was the function of colleges to oversee the complex process whereby knowledge could be priced and purchased The history of capitalism and the history of higher education Nelson reveals are intimately intertwined which raises a host of important and strikingly urgent questions How do we understand knowledge and education as commercial goods Who should pay for them And fundamentally what is the optimal system of higher education in a capitalist democracy     Empires of Ideas William C.
