

Tactical Combat Casualty Care Guidelines

November 2009

* All changes to the guidelines made since those published in the 2006 Sixth Edition of the PHTLS Manual are shown in **bold text**. The new material on burns is in red text.

Basic Management Plan for Care Under Fire

1. Return fire and take cover.
2. Direct or expect casualty to remain engaged as a combatant if appropriate.
3. Direct casualty to move to cover and apply self-aid if able.
4. Try to keep the casualty from sustaining additional wounds.
5. **Casualties should be extricated from burning vehicles or buildings and moved to places of relative safety. Do what is necessary to stop the burning process.**
6. Airway management is generally best deferred until the Tactical Field Care phase.
7. Stop *life-threatening* external hemorrhage if tactically feasible:
 - Direct casualty to control hemorrhage by self-aid if able.
 - **Use a CoTCCC-recommended tourniquet for hemorrhage that is anatomically amenable to tourniquet application.**
 - **Apply the tourniquet proximal to the bleeding site, over the uniform, tighten, and move the casualty to cover.**

PRINCIPLES OF TACTICAL COMBAT CASUALTY CARE TCCC The principles of Tactical Combat Casualty Care are fundamentally different from those of traditional civilian trauma care where most medical providers and medics train These differences are based on both the unique patterns and types of wounds that are suffered in combat and the tactical conditions medical personnel face in combat Unique combat wounds and tactical conditions make it difficult to determine which intervention to perform at what time Besides addressing a casualty s medical condition responding medical personnel must also address the tactical problems faced while providing care in combat A medically correct intervention at the wrong time may lead to further casualties Put another way good medicine may be a bad tactical decision which can get the rescuer and the casualty killed To successfully navigate these issues medical providers must have skills and training oriented to combat trauma care as opposed to civilian trauma care The specifics of casualty care in the tactical setting will depend on the tactical situation the injuries sustained by the casualty the knowledge and skills of the first responder and the medical equipment at hand In contrast to a hospital Emergency Department setting where the patient IS the mission on the battlefield care of casualties sustained is only PART of the mission TCCC recognizes this fact and structures its guidelines to accomplish three primary goals

- 1 Treat the casualty
- 2 Prevent additional casualties
- 3 Complete the mission

In thinking about the management of

combat casualties it is helpful to divide care into three distinct phases each with its own characteristics and limitations

Tactical Combat Casualty Care U. S. Army, 2014-09-20 A decade of intense combat in two theaters has taught us many lessons about what works and what does not in the effort to accomplish that all important mission of saving lives in battle A severely injured Soldier today has about twice the likelihood of surviving his wounds compared to Soldiers in wars as recent as Vietnam That progress is the result of many things better tactics and weapons better body armor and helmets better trained and fitter Soldiers But the introduction of Tactical Combat Casualty Care TCCC throughout the Army has certainly been an important part of that improvement TCCC is fundamentally different from civilian care It is the thoughtful integration of tactics and medicine but to make it work takes a different set of skills and equipment and every Soldier and leader needs to understand it and practice it This handbook is the result of years of careful study of the care of wounded Soldiers painstaking research by medics and physicians and the ability of leaders at all levels to see and understand the lessons being learned and the willingness to make the changes in equipment training and doctrine needed to improve the performance of the Army Health System It is the best guidance we have at the time of publication but new information new techniques or new equipment will drive changes in the future Be assured that these performance improvement efforts will continue as long as American Soldiers go in harm's way *Tactical Combat Casualty Care* US Army, 2025-03-20 *Tactical Combat Casualty Care Handbook* United States Army, 2017-05-17 Tactical Combat Casualty Care TCCC has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility Therefore the prehospital phase of care is needed to focus on reducing the number of combat deaths However few military physicians have had training in this area and at the onset of hostilities most combat medics corpsmen and pararescue personnel in the U S military have been trained to perform battlefield trauma care through civilian based trauma courses These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities **Combat Casualty Care** United States. Emergency War Surgery, 5th US Revision Miguel A. Cubano, 2018-10-01 Updated from the 2013 edition this volume reflects lessons learned from recent US involvement in Iraq and Afghanistan and represents state of the art principles and practices of forward trauma surgery Expertly addresses the appropriate medical management of blast wounds burns and multiple penetrating injuries as well as other battle and non battle injuries Topics include triage hemorrhage control airway breathing shock and resuscitation anesthesia infections critical care damage control surgery face and neck injuries soft tissue injuries ocular injuries head injuries extremity fractures thoracic injuries amputations abdominal injuries pediatric care and more A new chapter provides Tactical Combat Casualty Care guidelines Significant updates were also made to the blood collection and transfusion chapters Other products produced by the U S Army Borden Institute can be found here <https://bookstore.gpo.gov/agency/borden-institute>

Prolonged Casualty Care Steven G. Schauer, 2024 The focus on casualty care during approximately 6 to 72 hour post injury completes a missing component in the continuity of care at locations such as the battalion aid station Prolonged Casualty Care addresses this gap Combat casualties who require extended pre evacuation care have survived to reach a safe place Still that location is without surgical capabilities is not designed to hold patients for more than a few hours and likely has limited resources Providing medical care to stabilized casualties before evacuation to a higher role is a critical lifesaving skill set for non surgeon prehospital medical personnel

Tactical Medicine Carsten Dombrowski, 2024-03-24 This is a matter of life and death Tactical Medicine is emergency first aid Tactical Medicine is an umbrella term for medicine outside the typical comfort zone Tactical Combat Casualty Care TCCC is about caring for the wounded under very special circumstances while deployed and under fire The principles and procedures of Tactical Medicine also apply in situations where regular rescue services won't work or aren't available With this book Carsten Dombrowski himself an experienced medic clarifies standard operating procedures and helps the reader to understand TCCC principles more easily By understanding and applying these basics the reader can and should be able to deal with many possible applications of Tactical Medicine in the field Topics include TCCC Theory and Statistics Schemes for Examination First Aid Reporting Rescue and Evacuation How to Set Up a Helicopter Landing Zone Handling of Knockoff and Counterfeit Products Individual First Aid Kit IFAK
