Daim, 2021-03-16 This volume presents a portfolio of cases and applications on technology roadmapping TRM for products and services It provides a brief overview on criteria or metrics used for evaluating the success level of TRM and then offers six case examples from sectors such as transportation smart technologies and household electronics A new innovation in this book is a section of detailed technology roadmap samples that technology managers can apply to emerging technologies

Self-Tracking Btihaj Ajana, 2017-10-01 This book provides an empirical and philosophical investigation of self tracking practices In recent years there has been an explosion of apps and devices that enable the data capturing and monitoring of everyday activities behaviours and habits Encouraged by movements such as the Quantified Self a growing number of people are embracing this culture of quantification and tracking in the spirit of improving their health and wellbeing The aim of this book is to enhance understanding of this fast growing trend bringing together scholars who are working at the forefront of the critical study of self tracking practices Each chapter provides a different conceptual lens through which one can examine these practices while grounding the discussion in relevant empirical examples From phenomenology to discourse analysis from questions of identity privacy and agency to issues of surveillance and tracking at the workplace this edited collection takes on a wide and yet focused approach to the timely topic of self tracking It constitutes a useful companion for scholars students and everyday users interested in the Quantified Self phenomenon

Living Matter: The Preservation of Biological Materials in Contemporary Art Rachel Rivenc, Kendra Roth, 2022-05-24 This innovative volume is the first to address the conservation of contemporary art incorporating biological materials such as plants foods bodily fluids or genetically engineered organisms Eggshells flowers onion peels sponge cake dried bread breast milk bacteria living organisms these are just a few of the biological materials that contemporary artists are using to make art But how can works made from such perishable ingredients be preserved And what logistical ethical and conceptual dilemmas might be posed by doing so Because they are prone to rapid decay even complete disappearance biological materials used in art pose a range of unique conservation challenges This groundbreaking book probes the issues associated with displaying collecting and preserving these unique works of art The twenty four papers from the conference present a range of case studies prominently featuring artists perspectives as well as conceptual discussions thereby affording a comprehensive and richly detailed overview of current thinking and practices on this topic Living Matter is the first publication to explore broadly the role of biological materials in the creative process and present a variety of possible approaches to their preservation The free online edition of this open access publication is available at www.getty.edu/publications/living-matter and includes videos and zoomable illustrations Also available are free PDF EPUB and Kindle MOBI downloads of the book

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance

technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

Reimagining Justice, Human Rights and Leadership in Africa Everisto Benyera, 2019-08-08 Failed attempts in Africa to develop democratised and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political

leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems **Power, Legal Education, and Law**

School Cultures Meera Deo, Mindie Lazarus-Black, Elizabeth Mertz, 2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula The contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty **Wanderer on the American Frontier** John

Maley, 2018-10-04 For nearly two hundred years a fragment of the journal of John Maley an obscure explorer on the American frontier resided at Yale University and was treated with some skepticism by historians It was only in 2012 when the first half of the manuscript turned up at a barn sale in Pennsylvania and was acquired by Southern Methodist University's DeGolyer Library that the full story of Maley's travels could be pieced together Wanderer on the American Frontier makes the complete journal available for the first time allowing readers to follow a contemporary of Lewis and Clark on his journey through the Ohio Mississippi and Red River valleys and to reassess the account's authenticity Between 1808 and 1813 Maley covered more than 16 000 miles through thirteen present day states Much of that travel took him beyond the fringes of civilization and his journal offers some of the earliest descriptions of the Ozark Plateau the Ouachita Mountains and the upper reaches of the Red River His account also provides a firsthand look at life on the frontier in the tumultuous years following the Louisiana Purchase Editor F Andrew Dowdy has carefully retraced Maley's steps and with extensive use of maps has reconciled some of the journal's more confusing passages to give readers clear modern day reference points Numerous annotations and appendices provide necessary historical context from the link between Maley's 1809 Indiana copper exploration and the Treaty of Fort Wayne to the ways his 1811 foray into Spanish Texas presaged further filibusters there during the Mexican War for Independence The fascinating tale of one of the wider ranging explorers in American

history Wanderer on the American Frontier is an invaluable resource that provides a unique window on the West in the early nineteenth century

Handbook on Green Infrastructure Danielle Sinnett, Nick Smith, Sarah Burgess, 2015-11-27 Green infrastructure encompasses many features in the built environment. It is widely recognised as a valuable resource in our towns and cities and it is therefore crucial to understand, create, protect and manage this resource. This Handbook sets the context for green infrastructure as a means to make urban environments more resilient, sustainable, liveable and equitable. Including state of the art reviews that summarise the existing knowledge as well as research findings, this Handbook provides current evidence for the beneficial impact of green infrastructure on health, environmental quality and the economy. It discusses the planning and design of green infrastructure as a strategic network down to the individual features in a neighbourhood and looks at the process of green infrastructure implementation, emphasising the importance of collaboration across multiple professions and sectors. This comprehensive volume operates at multiple spatial scales from strategic networks at the regional level to individual features in neighbourhoods with international case studies used throughout to illustrate key examples of good practice. This collection of expert contributions will be invaluable to students and academics in the fields of planning, urban studies and geography. Practitioners and policy makers will also find the policy discussion and examples enlightening.

The Power of Anticipatory Images in Student Achievement James M. Davy, 2020-10-03 This book features ten high academically achieving low income inner city students from Newark, New Jersey who graduated from public high schools at or near the top of their class and continued to excel in college. Using a qualitative research design, the author interviewed the ten students and the person who most influenced their educational progress about what motivated them to achieve at such high levels. Three mutually reinforcing anticipatory images emerged as a common element of their stories. In their own voices, the students describe the anticipatory images they framed, how they developed them and how they used them to their advantage. Davy advances a theoretical model of the Anticipatory Competent student who continually progresses in the directions of the images projected ahead.

The Oxford Guide to Australian Languages Claire Bowern, 2023-06-19 The Oxford Guide to Australian Languages is a wide ranging reference work that explores the more than 550 traditional and new Indigenous languages of Australia. Australian languages have long played an important role in diachronic and synchronic linguistics and are a vital testing ground for linguistic theory. Until now, however, there has been no comprehensive and accessible guide to their vast linguistic diversity. This volume fills that gap, bringing together leading scholars and junior researchers to provide an up to date guide to all aspects of the languages of Australia. The chapters in the book explore typology, documentation and classification, linguistic structures from phonology to pragmatics and discourse, sociolinguistics and language variation, and language in the community. The final part offers grammatical sketches of a selection of languages, sub groups and families. At a time when the number of living Australian languages is significantly reduced, even compared to twenty years ago, this volume establishes priorities for future linguistic research and contributes to

the language expansion and revitalization efforts that are underway *Realities in Pedagogical and Phenomenological Contexts* Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches *Passions of the Christ* F. Scott Spencer, 2021-05-04 Senior New Testament scholar F Scott Spencer focuses on a neglected area in the study of Jesus and the Gospels the emotional life of Jesus This book offers a fresh reading of the Gospels through the lens of Jesus's emotions anger grief disgust surprise compassion and joy These emotions motivate Jesus's mission and reveal to Gospel readers what matters most to him Amid his passions Jesus forges his character as God's incarnate Messiah wholly embodied and emotionally engaged with others and thoroughly embedded in the surrounding environment **Competition Law for the Digital Economy** Björn Lundqvist, Michal S. Gal, 2019-12-27 The digital economy is gradually gaining traction through a variety of recent technological developments including the introduction of the Internet of things artificial intelligence and markets for data This innovative book contains contributions from leading competition law scholars who map out and investigate the anti competitive effects that are developing in the digital economy *The Flexible Workplace* Marko Orel, Ondřej Dvoutelý, Vanessa Ratten, 2021-01-19 With current socio economic development trends and changing work landscapes modern workplaces are progressively becoming a subject of flexibilisation and hybridisation Contemporary office environments are commonly adapting to the needs of the flexible labour markets by offering the non territorial and rotation based practice of allocating desks to workers on dynamic schedules This book explores this growing trend by offering different perspectives on the benefits and challenges of the flexible workplace phenomena Topics discussed range from defining and comparing flexible coworking and corpworking spaces policies made in local environments and the flexible working taxonomy *The Oxford Handbook on the United Nations* Thomas G. Weiss, Sam Daws, 2018-06-28 This Handbook provides in one volume an authoritative and independent treatment of the UN's seventy year history written by an international cast of more than 50 distinguished scholars analysts and practitioners It provides a clear and penetrating examination of the UN's development since 1945 and the challenges and opportunities now

facing the organization It assesses the implications for the UN of rapid changes in the world from technological innovation to shifting foreign policy priorities and the UN's future place in a changing multilateral landscape Citations and additional readings contain a wealth of primary and secondary references to the history politics and law of the world organization This key reference also contains appendices of the UN Charter the Statute of the International Court of Justice and the Universal Declaration of Human Rights

The Soft Power of Non-Western Small States Sarina Theys, 2024-09-12 This book critically engages with the concepts of small states and soft power and advances a new approach to defining small states a new conceptualisation of soft power and a method for empirically analysing the exercise of soft power It revisits the concepts of small states and soft power with a focus on Bhutan and Qatar and their approach to exercise soft power to achieve their foreign policy goals Building on two main perspectives to define small states the objective approach and the subjective perspective this book offers an intersubjective approach to define states as small The intersubjective approach requires a shared understanding between states that a certain state is small The book further highlights the importance of deconstructing the meaning of size and to separate the notion of size from the concept of power because size is not always indicative of power It argues that although small states tend to have fewer material resources than large states they nevertheless can have influence through the exercise of soft power Soft power is in this book defined as the ability of an actor to convince another actor that something is true Convincing deals with the beliefs of an actor and is a mental decision rather than a physical action This book argues that the exercise of soft power can be analysed through examining the development projection and reception of identities The findings of this book show that Bhutan was more successful than Qatar in exercising soft power and explains the reasons for this variation Aimed at a multidisciplinary audience this book will be of particular interest to practitioners scholars and students of International Relations Political Power Small States and Area Studies

Dramaturgy to Make Visible Peter Eckersall, 2024-06-14 This book argues that dramaturgy makes things visible and does so in two distinct and interrelating ways creative processes and formal elements of performance are rendered visible and readable and performance dramaturgy becomes an expanded practice in which performance is a locus for creating wide ranging events and activities This exploration defines dramaturgy as a perceptibly transforming agency in the construction presentation and reception of contemporary performance and it shows how contemporary performance has an intrinsic dramaturgical aspect whose proliferation of dramaturgical practices has led to a far reaching reinvention of what contemporary theatre is In doing so this book deals with a careful selection of performance practices including theatrical adaptations new media dramaturgy contemporary dance installation performance postdramatic theatre visionary works by auteurs and revivals of well known stage shows This study will be of great interest to students and scholars in theater studies performance studies cultural studies curating and dance scholarship
