

Documentation Guidelines: Psychiatric Disabilities

Students who are seeking accommodations or academic support services on the basis of psychiatric disability are required to submit documentation to verify eligibility under Section 504 of the Rehabilitation Act of 1973, the ADA of 1990, and the ADA Amendments Act of 2009. The following guidelines are provided to assure that documentation is appropriate to verify eligibility. Psychiatric disability is a generic term used to refer to a variety of conditions involving psychological, emotional, and behavioral disorders and syndromes. Criteria used to diagnose a psychiatric disorder are found in the Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5, American Psychiatric Association, 1994).

Qualifications of the Evaluator

The following licensed professionals are considered qualified to evaluate and diagnose psychiatric disabilities:

- Psychologists
- Psychiatrists
- Neuropsychologists
- Neuropsychiatrists
- Clinical Social Workers
- Licensed counselors

The name, title and professional credentials of the evaluator, including information about license or certification (e.g., licensed psychologist) as well as the area of specialization, employment and state/province in which the individual practices should be clearly stated in the documentation. Reports should be on letterhead, typed, dated, signed, and otherwise legible.

Documentation

Documentation should be recent **within six months** and should validate the need for services based on the individual's current level of functioning in the educational setting. If the comprehensive diagnostic report is more than six months old, the student must submit a letter from a qualified professional that provides an update of the diagnosis, a description of the current level of functioning and a rationale for accommodations.

Qualified documentation should include:

- Historical information, diagnostic interview and/or psychological assessment
- Specific diagnosis
- Description of current functional limitations in the academic setting as well as across other settings
- Relevant information regarding medications expected to be in use and the anticipated impact on the student in an academic setting
- Current treatment
- Recommendations for academic accommodations

Tests for Assessing Psychiatric Disabilities in Adolescents and Adults

In addition to clinical interviews, tests may be used to support the presence of functional limitations.

- **Rating scales:** Categorize and quantify the nature of the impairment; no single test or subtest should be used solely to substantiate a diagnosis.
- **Neuropsychological and psychoeducational testings:** Cognitive, achievement, and personality profiles may uncover attention or information-processing deficits; no single test or subtest should be used solely to substantiate a diagnosis.
- **Personality tests**

Psychiatric Documentation Guidelines:

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition American Psychiatric Association, 2015-07-29 Since the publication of the Institute of Medicine IOM report Clinical Practice Guidelines We Can Trust in 2011 there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy developed in a transparent fashion and based on a systematic review of the available research evidence To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality AHRQ American Psychiatric Association APA has adopted a new process for practice guideline development Under this new process APA's practice guidelines also seek to provide better clinical utility and usability Rather than a broad overview of treatment for a disorder new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies The quality of the overall body of evidence is also rated and is summarized in the practice guideline With the new process recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context Clear concise and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice with the goal of improving quality of care The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions Each module has a consistent organization which will assist users in finding clinically useful and relevant information quickly and easily This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process These guidelines address the following nine topics in the context of an initial psychiatric evaluation review of psychiatric symptoms trauma history and treatment history substance use assessment assessment of suicide risk assessment for risk of aggressive behaviors assessment of cultural factors assessment of medical health quantitative assessment involvement of the patient in treatment decision making and documentation of the psychiatric evaluation Each guideline recommends or suggests topics to include during an initial psychiatric evaluation Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions In addition to reviewing the available evidence on psychiatry evaluation each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care

[The American Psychiatric Association Practice Guideline for the Treatment of Patients With Borderline Personality Disorder](#) American Psychiatric Association, 2024-11-13 Borderline personality disorder BPD is estimated to have a lifetime prevalence in the United States of approximately 1.4% to 2.7% It is characterized by a long term pattern of instability in interpersonal relationships unstable self image marked impulsivity and or affective instability In addition features can be evidenced by efforts to avoid real or feared abandonment chronic feelings of emptiness mood reactivity recurrent self

injurious or suicidal behavior other impulsive behaviors with potential for self damaging effects intense anger or difficulty with anger control and transient paranoid ideation or stress related dissociative symptoms Although these manifestations can be quite heterogeneous the lived experience of BPD can be associated with significant emotional pain and a diminished quality of life Many individuals with BPD have co occurring psychiatric or somatic conditions and all cause mortality is increased among those with BPD Furthermore the lifetime burden and psychosocial impairment associated with BPD can be substantial because it typically has an early onset and can persist for many years These significant consequences support the need for early identification of BPD Importantly in contrast to many earlier views on BPD treatment is effective and symptoms can be reduced and managed The American Psychiatric Association Practice Guideline for the Treatment of Patients With Borderline Personality Disorder reviews current evidence and provides evidence based statements that are intended to optimize the treatment of BPD The guideline focuses on evidence based treatments and includes additional information on assessment and treatment planning which are an integral part of patient centered care It describes approaches to implementing recommendations and suggestions in clinical practice By providing up to date knowledge the guideline aims to help clinicians feel more confident in their skills for treating patients with BPD thereby improving the care and well being of their patients

The Maudsley Prescribing Guidelines in Psychiatry David M. Taylor, Thomas R. E. Barnes, Allan H. Young, 2018-07-16 The revised 13th edition of the essential reference for the prescribing of drugs for patients with mental health disorders The revised and updated 13th edition of *The Maudsley Prescribing Guidelines in Psychiatry* provides up to date information expert guidance on prescribing practice in mental health including drug choice treatment of adverse effects and how to augment or switch medications The text covers a wide range of topics including pharmacological interventions for schizophrenia bipolar disorder depression and anxiety and many other less common conditions There is advice on prescribing in children and adolescents in substance misuse and in special patient groups This world renowned guide has been written in concise terms by an expert team of psychiatrists and specialist pharmacists The Guidelines help with complex prescribing problems and include information on prescribing psychotropic medications outside their licensed indications as well as potential interactions with other medications and substances such as alcohol tobacco and caffeine In addition each of the book's 165 sections features a full reference list so that evidence on which guidance is based can be readily accessed This important text is the world's leading clinical resource for evidence based prescribing in day to day clinical practice and for formulating prescribing policy Includes referenced information on topics such as transferring from one medication to another prescribing psychotropic medications during pregnancy or breastfeeding and treating patients with comorbid physical conditions including impaired renal or hepatic function Presents guidance on complex clinical problems that may not be encountered routinely Written for psychiatrists neuropharmacologists pharmacists and clinical psychologists as well as nurses and medical trainees *The Maudsley Prescribing Guidelines in Psychiatry* are the established

reference source for ensuring the safe and effective use of medications for patients presenting with mental health problems

Lippincott's Manual of Psychiatric Nursing Care Plans Judith M. Schultz, Sheila L. Videbeck, 2009 Accompanying CD ROM has nursing care plans a customizable psychosocial assessment tool and monographs about psychotropic drugs **The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder** American Psychiatric Association, 2018-01-11 Alcohol use disorder AUD is a major public health problem in the United States The estimated 12 month and lifetime prevalence values for AUD are 13.9% and 29.1% respectively with approximately half of individuals with lifetime AUD having a severe disorder AUD and its sequelae also account for significant excess mortality and cost the United States more than 200 billion annually Despite its high prevalence and numerous negative consequences AUD remains undertreated In fact fewer than 1 in 10 individuals in the United States with a 12 month diagnosis of AUD receive any treatment Nevertheless effective and evidence based interventions are available and treatment is associated with reductions in the risk of relapse and AUD associated mortality The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder seeks to reduce these substantial psychosocial and public health consequences of AUD for millions of affected individuals The guideline focuses specifically on evidence based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning which are an integral part of using pharmacotherapy to treat AUD In addition to reviewing the available evidence on the use of AUD pharmacotherapy the guideline offers clear concise and actionable recommendation statements each of which is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms The guideline provides guidance on implementing these recommendations into clinical practice with the goal of improving quality of care and treatment outcomes of AUD

Resident's Guide to Clinical Psychiatry Lauren B. Marangell, 2009 This concise yet comprehensive guide distills the most critical and current information on diagnosis and treatment so that residents and other beginning clinicians will have the tools they need to quickly assess and competently treat patients with psychiatric illnesses Replete with diagnostic evaluation checklists DSM IV TR criteria and drug dosage tables the Resident's Guide to Clinical Psychiatry is a practical and convenient one stop resource that will make the resident's job significantly easier Each of the 16 chapters has been structured logically and with the utmost care to guide residents through the psychiatric landscape For example the chapter on pharmacotherapy is organized by class of drug with sections on mechanism of action indications and efficacy and tips for medication selection This is followed by detailed information on specific drugs their clinical use risks side effects management and potential interactions This depth of coverage is matched by breadth of subject with chapters on central topics such as mood disorders and dementia in addition to special chapters on consultation liaison psychiatry emergency psychiatry child and adolescent psychiatry and electroconvulsive therapy and device based treatments Whether employed as

a text or an on the fly reference this authoritative volume supplies everything the resident requires to provide a uniformly high level of psychiatric clinical care **American Psychiatric Association Practice Guidelines** American Psychiatric Association,1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic Practice guidelines can be vehicles for educating psychiatrists other medical and mental health professionals and the general public about appropriate and inappropriate treatments The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria Psychiatric Clinical Pathways Patricia C.
