Psychoanalysis Of Fire:

The Psychoanalysis of Fire Gaston Bachelard,1987-01-30 Bachelard is neither a self confessed and tortured atheist like Satre nor like Chardin a heretic combining a belief in God with a proficiency in modern science But within the French context he is almost as important as they are because he has a pseudo religious force without taking a stand on religion To define him as briefly as possible he is a philosopher with a professional training in the sciences who devoted most of the second phase of his career to promoting that aspect of human nature which often seems most inimical to science the poetic imagination J G Weightman The New York Times Review of Books **The Psychoanalysis of Fire** Gaston Bachelard,1964

The Psychoanalysis of Fire, by Gaston Bachelard Gaston Bachelard,1994 **The Psychoanalysis of Fire** Gaston Bachelard,1987-01-30 Bachelard is neither a self confessed and tortured atheist like Satre nor like Chardin a heretic combining a belief in God with a proficiency in modern science But within the French context he is almost as important as they are because he has a pseudo religious force without taking a stand on religion To define him as briefly as possible he is a philosopher with a professional training in the sciences who devoted most of the second phase of his career to promoting that aspect of human nature which often seems most inimical to science the poetic imagination J G Weightman The New York Times Review of Books **Encyclopedia of Contemporary Literary Theory** Irene Rima Makaryk,1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline As with any body of scholarship various schools of thought exist and sometimes conflict within it I R Makaryk has compiled a welcome guide to the field Accessible and jargon free the Encyclopedia of Contemporary Literary Theory provides lucid concise explanations of myriad approaches to literature that have arisen over the past forty years Some 170 scholars from around the world have contributed their expertise to this volume Their work is organized into three parts In Part I forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose The essays also discuss the uses and limitations of the various schools and the key issues they address Part II focuses on individual theorists It provides a more detailed picture of the network of scholars not always easily pigeonholed into the categories of Part I This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context Part III deals with the vocabulary of literary theory It identifies significant complex terms places them in context and explains their origins and use Accessibility is a key feature of the work By avoiding jargon providing mini bibliographies and cross referencing throughout Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture *Architecture and Fire* Stamatis Zografos,2019-06-12 *Architecture and Fire* develops a conceptual reassessment of architectural conservation through the study of the intimate relationship between architecture and fire Stamatis Zografos expands on the general agreement among many theorists that the primitive hut was erected around fire locating fire as the first memory of architecture at the very beginning of

architectural evolution Following the introduction Zografos analyses the archive and the renewed interest in the study of archives through the psychoanalysis of Jacques Derrida He moves on to explore the ambivalent nature of fire employing the conflicting philosophies of Gaston Bachelard and Henri Bergson to do so before discussing architectural conservation and the relationship between listed buildings the function of archives and the preservation of memories from the past The following chapter investigates how architecture evolves by absorbing and accommodating fire while the penultimate chapter examines the critical moment of architectural evolution the destruction of buildings by fire with a focus on the tragic disaster at London s Grenfell Tower in 2017 Zografos concludes with thoughts on Freud s drive theory He argues the practice of architectural conservation is an expression of the life drive and a simultaneous repression of the death drive which suggests controlled destruction should be an integral part of the conservation agenda Architecture and Fire is founded in new interdisciplinary research navigating across the boundaries of architecture conservation archival theory classical mythology evolutionary theory thermodynamics philosophy and psychoanalysis It will be of interest to readers working in and around these disciplines

Gaston Bachelard, Revised and Updated Roch C. Smith, 2016-06-03 Gaston Bachelard one of twentieth century France s most original thinkers is known by English language readers primarily as the author of *The Poetics of Space* and several other books on the imagination but he made significant contributions to the philosophy and history of science In this book Roch C Smith provides a comprehensive introduction to Bachelard s work demonstrating how his writings on the literary imagination can be better understood in the context of his exploration of how knowledge works in science After an overview of Bachelard s writings on the scientific mind as it was transformed by relativity quantum physics and modern chemistry Smith examines Bachelard s works on the imagination in light of particular intellectual values Bachelard derived from science His trajectory from science to a specifically literary imagination is traced by recognizing his concern with what science teaches about how we know and his increasing preoccupation with questions of being when dealing with poetic imagery Smith also explores the material and dynamic imagination associated with the four elements fire water air and earth and the phenomenology of creative imagination in Bachelard s *Poetics of Space* his *Poetics of Reverie* and in the fragments of *Poetics of Fire*

The Critical Path and Other Writings on Critical Theory, 1963-1975 Jean O'Grady, Eva Kushner, 2009-03-14 This volume which collects Northrop Frye s writings on the theory of literary criticism from the middle period of his career includes one of Frye s own favourites *The Critical Path* 1971 A highly important marker of Frye s career *The Critical Path*

openly addresses topics that he had previously been reluctant to discuss as fully including the importance of literature to society the responsibilities of critics and the deeper rationales for studying literature Filled with insightful texts that indicate his transition from literary critic to a theorist of language myth and human culture this edition helps to illuminate many of the ideas and arguments that would appear later in *The Great Code and Words with Power* Accompanied by the rigorous scholarship for which the series is renowned this is another valuable contribution to literary criticism and theory

Psychoanalysis of Fire. Translated by A.C.M.Ross Gaston BACHELARD,1964 *Topophilia* Yi-Fu Tuan,1990-11-20

What are the links between environment and world view *Topophilia* the affective bond between people and place is the primary theme of this book that examines environmental perceptions and values at different levels the species the group and the individual Yi Fu Tuan holds culture and environment and *topophilia* and environment as distinct in order to show how they mutually contribute to the formation of values *Topophilia* examines the search for environment in the city suburb countryside and wilderness from a dialectical perspective distinguishes different types of environmental experience and describes their character **Convulsing Bodies** Mark D. Jordan,2014-11-05 By using religion to get at the core concepts of Michel Foucault's thinking this book offers a strong alternative to the way that the philosopher's work is read across the humanities Foucault was famously interested in Christianity as both the rival to ancient ethics and the parent of modern discipline and was always alert to the hypocrisy and the violence in churches Yet many readers have ignored how central religion is to his thought particularly with regard to human bodies and how they are shaped The point is not to turn Foucault into some sort of believer or to extract from him a fixed thesis about religion as such Rather it is to see how Foucault engages religious rhetoric page after page even when religion is not his main topic When readers follow his allusions they can see why he finds in religion not only an object of critique but a perennial provocation to think about how speech works on bodies and how bodies resist Arguing that Foucault conducts experiments in writing to frustrate academic expectations about history and theory Mark Jordan gives equal weight to the performative and theatrical aspects of Foucault's writing or lecturing How does Foucault stage possibilities of self transformation How are his books or lectures akin to the rituals and liturgies that he dissects in them *Convulsing Bodies* follows its own game of hide and seek with the agents of totalizing systems not least in the academy and gives us a Foucault who plays with his audiences as he plays for them or teaches them

Tracking Thoreau John Dolis,2005 Arguing against the most recent trend in Thoreau studies Dolis contends that for Thoreau nature is primordially a construct it cannot be understood apart from language through cultural constructions techniques by means of which the subject composes the object Both nature and the very nature of nature itself are subject to this single configuration Subjectivity in turn entails its own technology its style It figures out both nature and the composition of its self as well Jacket **Film Phenomenologies** Kelli Fuery,2024-09-30 With an interdisciplinary agenda *Film Phenomenologies* investigates the emerging field of film phenomenology linking the fundamental significance of early

thinkers and related methods of phenomenological investigation to newer emphases and diverse voices such as Gaston Bachelard Karen Barad Simone de Beauvoir bell hooks Iris Murdoch and Hermann Schmitz Established scholars consider various themes including colonial duration and the politics of refusal feeling feminist time the exchange of play scalar theory and scattered bodies spectatorship and the entanglement of montage disability dance and speculative embodiment AI phenomenology and breath gestures cinematic atmospheres the precarious intimacy of the film screen stardom and biopics and Black lived experience Divided into three parts Film Phenomenologies offers a collective combination of phenomenological approaches braiding classic and critical methods to explore aesthetic embodied ethical and political perspectives It is the first collection to provide a substantial engagement with diverse and inclusive directions in the field of film and media studies

Architecture Martin van der Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic
