

704 INSTALLATION INSTRUCTIONS

Configuration Mode is selected by operation of a small switch on the rear, left-hand edge of the PCB. This is partially hidden to prevent accidental operation. See figs 1 and 2

Once Configuration Mode is selected, the 'Auto' LED will commence rapid flashing. When in Configuration Mode all normal operation is suspended. The 'Stop' pushbutton can be used to select the LED 'code' that corresponds to the required function. The 5 left hand LED's will form the code. The 'Manual' pushbutton will allow the user to change the function parameters. The 3 right-hand LED's inform the user of the current setting for the chosen function. When the required parameters are displayed, pressing the 'Auto' button will save the new setting. The process is repeated for each function change. When configuration is complete, the Configuration Mode Selector Switch should be returned to the 'Normal' position.

A key to all configuration options is provided overleaf on the Functions and Parameters table.
