**Police Intelligence** Wayne L. Davis,Paul J. Leslie,Ashley B. Davis,2023-03-30 Police Intelligence Totality of Circumstances is an essential resource and is

designed for any individual who may encounter the field of criminal justice whether the person is a police chief who oversees the department's standard operating procedures a police officer who enforces the law a civilian who is expected to follow the law a lawyer who may challenge an action in court or a judge who will interpret the law This book in part applies math and logic to laws and policies to objectively assess them Laws and policies are written as English logical statements English logical statements can be converted into mathematical logical statements which can be objectively assessed via Boolean algebra Specifically truth tables Venn diagrams flowcharts logic gates and logic circuits can all be used to assess laws policies and proper police actions For example mathematically it is not a glass blue marble means almost the exact opposite of it is not glass not blue and not marble In addition one must consider existential and universal quantifiers conditional statements and subsets to correctly interpret laws and policies Thus it is important for individuals to understand how to mathematically assess English logical statements e.g. the law because if they do not opponents in court may do it for them This book is important because collecting and understanding information and effectively communicating are vital skills in law enforcement It discusses different reference points for assessing good behavior different lenses of truth limitations of information and assumptions Furthermore it examines a variety of ways to collect and assess information which include interrogation techniques interviewing techniques an interrogatory and a deposition ciphering and deciphering messages body language handwriting analysis job interview questions and crime scene search patterns The chapters present a methodological reasoning process that is sorely lacking among police agencies and one that is essential for developing critical thinking skills and carrying out orders within legal confines Police Intelligence Totality of Circumstances is an indispensable resource for helping students and officers to collect and assess information Whether it is verbal or nonverbal information ciphered messages or using different bases for numeric communication individuals in criminal justice should learn to think outside the box to collect and understand available information

*Social Knowledge Management in Action*  
Remko Helms, Jocelyn Cranefield, Jurriaan van Reijssen, 2017-02-23 Knowledge management KM is about managing the lifecycle of knowledge consisting of creating storing sharing and applying knowledge Two main approaches towards KM are codification and personalization The first focuses on capturing knowledge using technology and the latter on the process of socializing for sharing and creating knowledge Social media are becoming very popular as individuals and also organizations learn how to use it The primary applications of social media in a business context are marketing and recruitment But there is also a huge potential for knowledge management in these organizations For example wikis can be used to collect organizational knowledge and social networking tools which leads to exchanging new ideas and innovation The interesting part of social media is that by using them one immediately starts to generate content that can be useful for the organization Hence they naturally combine the codification and personalisation approaches to KM This book aims to provide an overview of new and innovative applications of social media and to report challenges that need to be solved One example is the

watering down of knowledge as a result of the use of organizational social media Von Krogh 2012      **Sustaining Quality Teaching and Learning to Instil Good Discipline and Academic Performance** Afungmeyu Jane-Francis

Abongdia,Vuyisile Mathew Ngoqo,2018-12-19 This book presents an engaging as well as inspiring array of issues and insights drawn from the perspective of dialogic imagination aimed at quality teaching and learning experiences The authors passionately uphold their belief that the prevalence of good discipline and good academic performance are mutually interrelated and if these two prevail in the ecosphere of any classroom these can significantly enrich and enhance the quality of learning in any school settings Based on this South Africa has made huge strides towards improving the quality of education and people s lives However discipline and academic performance still lag behind due to the lack of quality teaching which also prevents the Department of Education from accomplishing its objectives Ironically this takes place at a time when the government has resolved to prioritise education among other important developmental issues To this effect this book explores how quality teaching and learning can ensure that discipline and academic performance prevail It shows that quality teaching and learning have the potential to determine discipline and academic performance particularly now that other disciplinary measures have been seen to be ineffective It is framed theoretically by the school improvement theory supported by Radical Constructivism and Critical Realism and uses case studies to highlight its findings The book shows that quality teaching and learning can free human potential and ensure that it is developed in line with democratic ideals and identifies the environment as playing an important role in ascertaining whether or not quality teaching and learning can determine discipline and academic performance in schools      **A Best Practice Process for Collaboration Based on Knowledge Created by Internal Coaches and Six Sigma Green Belts** ,      *Occupational Stress in South African Work Culture*

Nasima MH Carrim,J. Alewyn Nel,Riana Schoeman,2021-01-30 This book explores avenues for organisations to better understand the origins of occupational stress so as to enable their managerial employees to effectively manage stress levels By way of the work locus of control as a personality variable the book identifies stressors both within and outside the organisation that underpin high stress levels in organisational culture In grappling with what is required in the new workforce of Generation Y millennials in a hyper networked and mobile age the authors present examples from everyday professional situations in South Africa to contribute to critical understanding of today s working world By applying neuroscientific principles developed from a foundation of empirical research the authors introduce the concepts of a red zone and blue zone to explain differences between the brain areas controlled either by its stem limbic areas or the limbic cortical cortex areas respectively This becomes a psychological shorthand for describing and applying knowledge to encourage practitioners in leadership and management roles to achieve desired behaviour outcomes and to establish a framework for understanding employee values and worldviews The book is relevant to practitioners postgraduate students and researchers interested in industrial psychology personality psychology business management and human resources      "RETENTION

FACTORS FOR AUTOMOBILE INDUSTRY" Dr. Neerja R. Aswale,2017-12-30 Philosophically employee retention is important in almost all cases it is senseless to allow good people to leave your organization When they leave they take with them intellectual property relationships investments in both time and money an occasional employee or two and a chunk of your future Employee Retention Strategies helps organizations provide effective employee communication to improve commitment and enhance workforce support for key corporate initiatives
