Estimation QE metrics where the goal is to provide an estimate on how good or reliable the texts produced by an application are without access to gold standard outputs QE enables different types of evaluation that can target different types of users and applications Machine learning techniques are used to build QE models with various types of quality labels and explicit features or learnt representations which can then predict the quality of unseen system outputs This book describes the topic of QE for text to text applications covering quality labels features algorithms evaluation uses and state of the art approaches It focuses on machine translation as application since this represents most of the QE work done to date It also briefly describes QE for several other applications including text simplification text summarization grammatical error correction and natural language generation *Who's Who in Research: Performing Arts* Intellect Books,2013-01-01 Increasingly academic communities transcend national boundaries Collaboration between researchers across space is clearly increasing as well as being increasingly sought after noted the online magazine Inside Higher Ed in a recent article about research in the social sciences and humanities Even for those scholars who don t work directly with international colleagues staying up to date and relevant requires keeping up with international currents of thought in one s field But when one s colleagues span the globe it s not always easy to keep track of who s who or what kind of research they re conducting That s where Intellect s new series comes in A set of worldwide guides to leading academics and their work across the arts and humanities Who s Who in Research features comprehensive profiles of scholars in the areas of cultural studies film studies media studies performing arts and visual arts Who s Who in Research Performing Arts includes concise yet detailed listings include each academic s name institution biography and current research interests as well as bibliographic information and a list of articles published in Intellect journals The volumes in the Who s Who in Research series will be updated each year providing the most current information on the foremost thinkers in academia and making them an invaluable resource for scholars hiring committees academic libraries and would be collaborators across the arts and humanities **English Mechanic and World of Science** ,1893 **Mark Twain's Travel Literature** Harold H. Hellwig,2015-01-28 This critical study analyzes major concepts in the travel literature of Mark Twain and notes how his oeuvre including his classic works of fiction revolves around travel as a central issue The book focuses especially on his representations of time place and identity in the travel works Roughing It A Tramp Abroad The Innocents Abroad Life on The Mississippi and Following the Equator All receive an in depth analysis noting Twain s strong sense of nostalgia for the disappearing American frontier his growing concern over the assimilation of Native American cultures and his continual search for a sense of personal and national identity One appendix provides a complete list of the travel literature contained in Twain s personal library
