author whose experiences in travel and deep fascination with science greatly informed his writing His early life in Nantes a coastal city in France exposed him to maritime culture while his connections to the scientific community helped fuel his imagination 20 000 Leagues Under the Sea was born out of an era of burgeoning scientific exploration with Verne often considered a precursor to modern science fiction exploring both the potential and peril of the new technologies of his time I wholeheartedly recommend this masterpiece to readers eager to embark on a thrilling voyage beneath the waves Verne s intricate storytelling combined with the breathtaking illustrations serves as an invitation to explore the depths of human creativity and curiosity This novel not only entertains but also provokes thoughtful reflection on our relationship with nature and technology **A dictionary of poetical illustrations** Robert Aitkin Bertram,1877 *Fisher's Drawing Room*

Scrap-book; with Poetical Illustrations by L. E. L Fisher,1839 The Oxford Illustrated History of World War Two Richard Overy,2015-04-09 World War Two was the most devastating conflict in recorded human history It was both global in extent and total in character It has understandably left a long and dark shadow across the decades Yet it is three generations since hostilities formally ended in 1945 and the conflict is now a lived memory for only a few And this growing distance in time has allowed historians to think differently about how to describe it how to explain its course and what subjects to focus on when considering the wartime experience For instance as World War Two recedes ever further into the past even a question as apparently basic as when it began and ended becomes less certain Was it 1939 when the war in Europe began Or the summer of 1941 with the beginning of Hitler s war against the Soviet Union Or did it become truly global only when the Japanese brought the USA into the war at the end of 1941 And what of the long conflict in East Asia beginning with the Japanese aggression in China in the early 1930s and only ending with the triumph of the Chinese Communists in 1949 In The Oxford Illustrated History of World War Two a team of leading historians re assesses the conflict for a new generation exploring the course of the war not just in terms of the Allied response but also from the viewpoint of the Axis aggressor states Under Richard Overy s expert editorial guidance the contributions take us from the genesis of war through the action in the major theatres of conflict by land sea and air to assessments of fighting power and military and technical innovation the economics of total war the culture and propaganda of war and the experience of war and genocide for both combatants and civilians concluding with an account of the transition from World War to Cold War in the late 1940s Together they provide a stimulating and thought provoking new interpretation of one of the most terrible and fascinating episodes in world history *Fisher's drawing room scrap-book, with poetical illustrations by L.E.L.
