**A Rogue's Conscience** David Christie Murray, 1899

**Rogue River Journal** John Daniel, 2005-04-14 In November of 2000 after the presidential election but before the final results had been handed down by the Supreme Court John Daniel climbed into his pickup drove to a remote location in Oregon's Rogue River Canyon and quit civilization The strictures were severe with no two way human communication not even with his wife and no radio no music not even his cat He would isolate himself in a cabin sure to be snowed in soon after his arrival intent on hearing no human voice but his own until spring thawed the road This experiment in solitude was an attempt to clarify his identity while pursuing daily life without the distractions of the world at large Daniel

had spent a week or two alone before but this would be an entirely new challenge and as he drove off into the mountains he felt a fear tinged freedom Rogue River Journal chronicles his journey in solitude a season of memory and his search for a coherent place to stand on the earth

Guide to Wireless Network Security John R. Vacca, 2006-10-16 1 INTRODUCTION With the increasing deployment of wireless networks 802.11 architecture in enterprise environments IT enterprises are working to implement security mechanisms that are equivalent to those existing today for wire based networks An important aspect of this is the need to provide secure access to the network for valid users Existing wired network jacks are located inside buildings already secured from unauthorized access through

the use of keys badge access and so forth A user must gain physical access to the building in order to plug a client computer into a network jack In contrast a wireless access point AP may be accessed from off the premises if the signal is detectable for instance from a parking lot adjacent to the building Thus wireless networks require secure access to the AP and the ability to isolate the AP from the internal private network prior to user authentication into the network domain Furthermore as enterprises strive to provide better availability of mission critical wireless data they also face the challenge of maintaining that data s security and integrity While each connection with a client a supplier or a enterprise partner can improve responsiveness and efficiency it also increases the vulnerability of enterprise wireless data to attack In such an environment wireless network security is becoming more important every day Also with the growing reliance on e commerce wireless network based services and the Internet enterprises are faced with an ever increasing responsibility to protect their systems from attack
