

and businesses into the street to block access to the area. Then automobiles were moved up and arranged so that their headlights would illuminate the intersections in front of the portable barricades. Behind the Dumpsters, groups of armed residents assembled and waited.

Hour after hour, vehicles filled with thugs armed with guns and Molotov cocktails approached the barricades and looked them over carefully. Each time the outcome was the same. Arms were brandished and warnings were issued from the obviously well-fortified defenders, at which point the vehicles sped away. Only once did the neighborhood protectors need to punctuate a point with a warning shot.

When the crisis was over five days later, the street was intact. Unlike the devastation that occurred in so many other parts of the city, not a store had been looted, not a home had been burned, and no one had been hurt. Such are the rewards of careful neighborhood preparations.

## II. Make Your Home A Fortress:

You must also physically secure your home against any likely urban disaster. If so much as a mouse comes up your walk, you must know everything about him but his hat size.

As with neighborhood defense, your goal must be to stop looters and arsonists at your property line. That's relatively easy to accomplish if you make the proper use of walls, fences, decorative barricades, and floodlights. If any attackers attempt to get past your defenses, you will be dealing with them at a distance with all the advantages in your favor.

You must also harden the access points to your home with modern high-security Medeco locks, MAG Engineering deadbolts, Lexan windows, and metal-clad doors. Although you may not be able to keep intruders outside forever, the added measures will give you enough time to deal with them effectively. Suitable home safes from AMSEC and fireproof containers

from Aladdin should also be included in your defense system.

You can greatly increase your family's safety if you complement your home's physical barriers with a good electronic security system, such as the excellent Keep-safer Plus. Such a wireless system can warn you of a problem before it becomes life-threatening. It can also let your intruders know that their presence has been detected. A good system can even initiate the first level of defense measures that you may have established. All in all, properly selected, computer-controlled security equipment is well worth its modest cost.

## III. Prepare Your Household to Be Self-Reliant:

You must carefully stockpile essential equipment and supplies to sustain your family during the period of isolation that always follows large-scale disasters. Besides the certain loss of municipal assistance, you can also expect to be cut off from every product and service

### Firearms for Home and Neighborhood Security

No defense system is effective if it doesn't include the ability to repel attackers with appropriate force. That is becoming particularly true today when aggressors are usually armed with the latest weapons. To engage such threats without the same degree of strength is to invite the worst sort of outcome.

It will be essential for each member of your defense group to know the circumstances during which the use of guns is and is not permitted in your area. In most states, deadly force can only be used to stop a clear and immediate threat to a human life when no effective alternative is available. If you are in doubt about your local laws, write to your city attorney for clarification. Photocopy and distribute the reply to everyone in your group.

The Gothic Romanticism's gritty older sibling has flourished in myriad permutations since the eighteenth century In Gothicka Victoria Nelson identifies the revolutionary turn it has taken in the twenty first Today's Gothic has fashioned its monsters into heroes and its devils into angels It is actively reviving supernaturalism in popular culture not as an evil dimension divorced from ordinary human existence but as part of our daily lives To explain this millennial shift away from the traditionally dark Protestant post Enlightenment Gothic Nelson studies the complex arena of contemporary Gothic subgenres that take the form of novels films and graphic novels She considers the work of Dan Brown and Stephenie Meyer graphic novelists Mike Mignola and Garth Ennis Christian writer William P Young author of The Shack and filmmaker Guillermo del Toro She considers twentieth century Gothic masters H P Lovecraft Anne Rice and Stephen King in light of both their immediate ancestors in the eighteenth century and the original Gothic the late medieval period from which Horace Walpole and his successors drew their inspiration Fictions such as the Twilight and Left Behind series do more than follow the conventions of the classic Gothic novel They are radically reviving and reinventing the transcendental worldview that
