Ankersmit, 2012-04-24 In this book the noted intellectual historian Frank Ankersmit provides a systematic account of the problems of reference truth and meaning in historical writing He works from the conviction that the historicist account of historical writing associated primarily with Leopold von Ranke and Wilhelm von Humboldt is essentially correct but that its original idealist and romanticist idiom needs to be translated into more modern terms Rehabilitating historicism for the contemporary philosophy of history he argues reveals the basic truths about the nature of the past itself how we relate to it and how we make sense of the past in historical writing At the heart of Ankersmit's project is a sharp distinction between interpretation and representation The historical text he holds is first and foremost a representation of some part of the past not an interpretation The book's central chapters address the concept of historical representation from the perspectives of reference truth and meaning Ankersmit then goes on to discuss the possible role of experience in the history writing which leads directly to a consideration of subjectivity and ethics in the historian's practice Ankersmit concludes with a chapter on political history which he maintains is the basis and condition of all other variants of historical writing Ankersmit's rehabilitation of historicism is a powerfully original and provocative contribution to the debate about the nature of historical writing **Successes And Failures Of Health Policy In Europe: Four Decades Of Divergent Trends And Converging Challenges** Mackenbach, Johan, McKee, Martin, 2013-03-01 This book will help those involved in health policy making to understand the various successes and failures of health policies around Europe and the complex choices that confront the health systems of Europe **The Oxford Handbook of 4E Cognition** Albert Newen, Leon De Bruin, Shaun Gallagher, 2018-08-30 4E cognition embodied embedded enactive and extended is a relatively young and thriving field of interdisciplinary research It assumes that cognition is shaped and structured by dynamic interactions between the brain body and both the physical and social environments With essays from leading scholars and researchers The Oxford Handbook of 4E Cognition investigates this recent paradigm It addresses the central issues of embodied cognition by focusing on recent trends such as Bayesian inference and predictive coding and presenting new insights such as the development of false belief understanding The Oxford Handbook of 4E Cognition also introduces new theoretical paradigms for understanding emotion and conceptualizing the interactions between cognition language and culture With an entire section dedicated to the application of 4E cognition in disciplines such as psychiatry and robotics and critical notes aimed at stimulating discussion this Oxford handbook is the
