

## DEFINITIONS

**Population Density:** this is the number of people per unit area. The density of population is obtained by dividing the total population of a country (or any region) by the total area of the country (or region). The density of population for a country can be misleading as it does not show variations between densely populated regions and those areas that are almost unpopulated. Population densities are often shown on choropleth maps.

**Population Distribution:** describes the way people are located within an area. When plotted on a map, this can reveal those areas that have a high population and those where few people live, which maps of population density fail to show. One of the ways of plotting this information is by means of a dot map.

## QUESTIONS

1.
  - density is very high in Asia
  - density seems to be higher in countries with a large population

2.
  - population is heavily distributed to the west (in Europe) and the south (in Asia)
  - there are many potential reasons for this:
    - o climate and weather patterns
    - o access to resources
    - o fertility of land
    - o access to freshwater
    - o access to oceans/sea for transportation/shipping of goods
    - o colonial patterns
    - o religion – e.g. Nigeria, Indonesia, Philippines – both Islam and Roman Catholicism promote large families and reject birth control
