Data Mining and Big Data Ying Tan,Yuhui Shi,Albert Zomaya,Hongyang Yan,Jun Cai,2021-10-29 This two volume set CCIS 1453 and CCIS 1454 constitutes refereed proceedings of the 6th International Conference on Data Mining and Big Data DMBD 2021 held in Guangzhou China in October 2021 The 57 full papers and 28 short papers presented in this two volume set were carefully reviewed and

selected from 258 submissions The papers present the latest research on advantages in theories technologies and applications in data mining and big data The volume covers many aspects of data mining and big data as well as intelligent computing methods applied to all fields of computer science machine learning data mining and knowledge discovery data science etc

Pro Hadoop Data Analytics Kerry Koitzsch, 2016-12-29 Learn advanced analytical techniques and leverage existing tool kits to make your analytic applications more powerful precise and efficient This book provides the right combination of architecture design and implementation information to create analytical systems that go beyond the basics of classification clustering and recommendation Pro Hadoop Data Analytics emphasizes best practices to ensure coherent efficient development A complete example system will be developed using standard third party components that consist of the tool kits libraries visualization and reporting code as well as support glue to provide a working and extensible end to end system The book also highlights the importance of end to end flexible configurable high performance data pipeline systems with analytical components as well as appropriate visualization results You ll discover the importance of mix and match or hybrid systems using different analytical components in one application This hybrid approach will be prominent in the examples What You ll Learn Build big data analytic systems with the Hadoop ecosystem Use libraries tool kits and algorithms to make development easier and more effective Apply metrics to measure performance and efficiency of components and systems Connect to standard relational databases noSQL data sources and more Follow case studies with example components to create your own systems Who This Book Is For Software engineers architects and data scientists with an interest in the design and implementation of big data analytical systems using Hadoop the Hadoop ecosystem and other associated technologies

Succeed In Software Sean Cannon, 2023-01-05 Attention coders Are you earning less than 300 000 per year as a software engineer Have you been grinding away as a junior or mid level developer for too long and the promotions aren t coming Have you recently completed a coding boot camp and now you re in the deep end with no clear direction on how to advance your career This book can help you master the skills necessary to stand out at the top of our field While you wait for your next annual review you are helping to make your executive team rich while they pay you an entry level salary and consider you nothing more than a replaceable cog in the machine Over the past 20 years working as a software professional I have been collecting extremely valuable lessons that have helped me become one of the highest paid most reliable developers in my network I no longer worry about money I no longer work overtime and instead of competing with my peers for promotions I now have companies competing with each other for my time and skillset You don t need a college degree and you don t need to master a bunch of programming languages or become an expert at all the new libraries and frameworks to get where I am That is a waste of time and money and all you are doing is helping other people realize their goals instead of realizing your own The career ladder is simply a game of profits and resources and once you learn and understand how the people above you perceive value and who your clients really are you will soar past your colleagues If you

don't want to spend years crawling your way to the top on your own like I did working twice as hard as everybody else just to get noticed for promotions then let me help you cut those years or even decades off that journey it's time to take control of your software career and kick it into high gear right now

Futuristic Design and Intelligent Computational Techniques in Neuroscience and Neuroengineering Singh, Harjit Pal, Sharma, Anurag, Khullar, Vikas, 2022-01-07 Each day novel neuroscientific findings show that researchers are focusing on developing advanced smart hardware designs and intelligent computational models to imitate the human brain's computational abilities. The advancements in smart materials provide a significant role in inventing intelligent bioelectronic device designs with smart features such as accuracy, low power consumption, and more. These advanced and intelligent computing models through machine and smart deep learning algorithms help to understand the information processing capabilities of the human brain with optimum accuracy. Futuristic Design and Intelligent Computational Techniques in Neuroscience and Neuroengineering highlights advanced computational models and hardware designs in neurology and integration of mathematical, physical, biological, chemical, and engineering models to mimic brain functions, discovers new technological diagnosis techniques, and achieves high accuracy in learning models to better understand the functioning of the human brain. Providing rich information on brain-computer interfacing, gamification in children, and vestibular rehabilitation, this text acts as an essential resource for experts in electrophysiological studies, neurologists, neurophysiotherapists, neuro-radiologists, intelligent system developers, bio-software and hardware developers, neuro-database collectors, electro-physiologists, professors associated with neurology, psychiatrists, engineers, scientists, and students from academia and industry involved in interdisciplinary approaches to neurology.

Business Modeling and Software Design Boris Shishkov, 2024-07-01 This book constitutes the refereed proceedings of the 14th International Symposium on Business Modeling and Software Design BMSD 2024 which took place in Luxembourg during July 1-3, 2024. The 13 full and 7 short papers included in this book were carefully reviewed and selected from a total of 54 submissions. BMSD is a leading international forum that brings together researchers and practitioners interested in business modeling and its relation to software design. Particular areas of interest are Business Processes and Enterprise Engineering, Business Models and Requirements, Business Models and Services, Business Models and Software Information Systems Architectures and Paradigms, Data Aspects in Business Modeling and Software Development, Blockchain Based Business Models and Information Systems, IoT and Implications for Enterprise Information Systems. Each year a special theme is chosen for making presentations and discussions more focused, and in 2024 it is Towards Socially Responsible Information Systems.

Engineering the Web in the Big Data Era Philipp Cimiano, Flavius Frasin, Geert-Jan Houben, Daniel Schwabe, 2015-06-09 This book constitutes the refereed proceedings of the 15th International Conference on Web Engineering ICWE 2015 held in Rotterdam, The Netherlands, in June 2015. The 26 full research papers, 11 short papers, 7 industry papers, 11 demonstrations, 6 posters, and 4 contributions to the PhD symposium presented were carefully reviewed.
