The IFPUG Guide to IT and Software Measurement IFPUG, 2012-04-25 The widespread deployment of millions of

current and emerging software applications has placed software economic studies among the most critical of any form of business analysis. Unfortunately, a lack of an integrated suite of metrics makes software economic analysis extremely difficult. The International Function Point Users Group (IFPUG), a nonprofit and member-governed organization, has become the recognized leader in promoting the effective management of application software development and maintenance activities. The IFPUG Guide to IT and Software Measurement brings together 52 leading software measurement experts from 13 different countries who share their insights and expertise. Covering measurement programs, function points in measurement, new technologies, and metrics analysis, this volume illustrates software measurement's role in new and emerging technologies. Addresses the impact of agile development on software measurement. Presents measurement as a powerful tool for auditing and accountability. Includes metrics for the CIO. Edited by IFPUG's Management and Reporting Committee, the text is useful for IT project managers, process improvement specialists, measurement professionals, and business professionals who need to interact with IT professionals and participate in IT decision making. It includes coverage of cloud computing, agile development, quantitative project management, process improvement, measurement as a tool in accountability, project ROI, measurement metrics for the CIO, value stream mapping, and benchmarking.

[First Steps in SAP S/4HANA Controlling - second edition](#) Ashish Sampat, Tom King, 2025-07-25. This comprehensive introduction to SAP Controlling CO in S/4HANA covers the fundamentals of the organizational structure, master data, and functions of SAP Controlling, including overhead controlling, product costing, month-end closing, and reporting. Using a fictional chocolate manufacturing company case study, you'll learn about key day-to-day functions such as cost planning, production controlling, actual costing, and information systems. Explore how SAP CO integrates with other SAP modules and gain insights into the functional areas commonly found in manufacturing organizations. Dive into master data elements and learn how to maintain consistent and accurate data. Review planning methods and get an overview of cost center planning, including overhead planning and labor cost planning. Identify issues with old GUI transactions in the planning process and learn how to upload plan data. Understand how SAP Material Ledger can be used to accurately determine costs and how actual costs are booked and absorbed. Examine important features of S/4HANA, including universal allocations, cost elements, variances, and COGS split. Cost center and product cost planning, actual cost flow. Best practices for cost absorption using Product Cost Controlling. Month-end closing activities in SAP S/4HANA Controlling. Examples and screenshots based on a case study approach.

Handbook of Research on Enterprise Systems Gupta, Jatinder N. D., Sharma, Sushil, Rashid, Mohammad A., 2009-01-31. Addresses the field of enterprise systems, covering progressive technologies, leading theories, and advanced applications.

Republic of Estonia International Monetary Fund. Fiscal Affairs Dept., 2019-06-03. This Technical Assistance Report on the Republic of Estonia highlights that public investment is a priority spending area and Estonia is seeking to strengthen the efficiency and effectiveness of its capital expenditure from an already high level. Estonia's public investment is relatively efficient while

further improvements should pay attention to the quality of public services enabled by them Investment implementation is particularly strong This reflects Estonia s open procurement framework that utilizes an advanced e procurement system its modern treasury that employs an effective Treasury Single Account system to guarantee cash availability asset monitoring that has been made routine through full accrual accounting for the whole public sector and active project management by ministries Some practices that are already effectively implemented should be formalized in the institutional design which will act as a safeguard Public investment projects should be managed in an integrated portfolio at all stages of the investment cycle It is difficult to obtain a picture of all important investment projects pursued in the public sector including by local governments and state owned enterprises A comprehensive portfolio view of all projects supports transparent prioritization across sectors and the identification of systemic patterns or risks
