

## My Dream Job

Since childhood, it is my dream to be a teacher. It is the noblest job in the world where teacher molds the characters of different personalities not just in academics but as well as the individual. There will be no doctors and any other professions if there are no teachers thus, the future of our nation lies on the teacher 's hands. This principle is inculcated in my mind and it motivates me to pursue this dream of mine.

As an aspirant, I want to be competitive and equipped in the profession I have chosen which is to be a good teacher someday because I want to give my future students the best of me and not the least. This dream motivates me to further my studies in education where I can be a competitive teacher and a role model to my students. I believe that the graduate study would be able to help me achieve this dream.

This program, graduate study, would help me become more develop and equip on the things that I want to learn that I can be able to use in my teaching career in the future. I believe that it is not sufficient to be a graduate of a normal school or college or to stand high in the profession of teaching. Like the students, the teacher must grow, and this growth must be long lines both professional and general. The teacher must have knowledge of educational movements and a familiarity with the progress in educational thought and research.

Hence, with the progress in education literature and new education textbooks, and adopt the new ideas that are sound that I can learn from the graduate school The zeal with which the teacher takes up and tests them in is one of the most helpful features of education work. The graduate school would help me become an earnest searcher and investigator in my own professional field. Thus, this program would develop my ability to create an effective learning situation.

Review I am beyond impressed with this book I hope this truly is the start of a long series Reader Review **Girl Archaeologist** Alice Beck Kehoe, 2022-03 2022 Choice Outstanding Academic Title Girl Archaeologist recounts Alice Kehoe's life begun in an era very different from the twenty-first century in which she retired as an honored elder archaeologist. She persisted against entrenched patriarchy in her childhood at Harvard University and as she did fieldwork with her husband in the northern plains. A senior male professor attempted to quash Kehoe's career by raping her. Her Harvard professors refused to allow her to write a dissertation in archaeology. Universities paid her less than her male counterparts. Her husband refused to participate in housework or childcare. Working in archaeology and in the histories of American First Nations, Kehoe published a series of groundbreaking books and articles. Although she was denied a conventional career through her unconventional breadth of research and her empathy with First Nations people, she gained a wide circle of collaborators and colleagues. Throughout her career, Kehoe found and fostered a sisterhood of feminists, strong, bright women, archaeologists, anthropologists, and ethnohistorians who have been essential to the field. Girl Archaeologist is the story of how one woman pursued a professional career in a male-dominated field during a time of great change in American middle-class expectations for women.

**Educators: A Wise Giver's Guide to Cultivating Great Teachers and Principals** Laura Vanderkam, 2014-04-27 The strongest influence on whether a student learns and how much is the teacher. Never mind fancy facilities, new technology, top curricula, or more school spending: research shows that the intelligence, skill, and dedication of the instructor is two to three times as important as any other contribution to student outcomes. If we want to improve schools, we must raise the quality of teachers. Yet credentials, degrees, years on the job have little to do with classroom excellence. Fascinating investigations have recently given us clearer pictures of what a successful teacher looks like. Now leading schools are beginning to hire and mentor teachers differently, with a clear-eyed focus on their demonstrated ability to transfer knowledge to their students. New techniques for measuring and enhancing the teacher's capacity to add value in the classroom are the most promising elements in school reform today. Putting them into effect, though, requires wise and brave school leaders. Without bold, sober, demanding principals, few schools will build a truly excellent set of instructors. This book is for public-spirited donors who

want to foster educational excellence by elevating teachers and principals It reviews the latest academic research and on the ground experience of reformers and offers practical advice on multiple fronts It is written for philanthropists and allies active in the field who want to make a positive difference
