learning environments to foster self directed learning This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter albeit theoretical methodological or empirical in nature this in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self directed learning

**Critical Reflections on Teacher Education in South Africa** Labby Ramrathan, Suriamurthe Maistry, Sylvan Blignaut, 2024-06-19 This edited volume focuses on Curriculum scholars critical reflections on teacher education TE within South Africa to offer insights into critical considerations for the socio economic transformational social and environmental justice and decolonization challenges that the country faces Much of the literature on teacher education takes on a policy and practice focus to the exclusion of deep and fundamental curriculum questions on what is teacher education for for whom where and who decides Within South Africa the Minimum Requirements for Teacher Education Qualification MRTEQ forms the official policy that informs teacher education curriculum and certification to become a teacher This volume raises critical and complicated questions for teacher educators and curriculum scholars to inspire a deeper understanding of teacher education beyond a set of parochial policy prescribed modules courses that one needs to take to become a professional teacher

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is

much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well trained teachers, early childhood education and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few. Prof Martin Carnoy, Stanford University. Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence-based itinerary for the next few steps. **Being a Teacher in Post-Apartheid South Africa** Yusuf Sayed, Marcina Singh, 2025-05-01 In a compelling exploration of the challenges faced by newly qualified teachers (NQTs) in South Africa's evolving educational landscape, this book provides an empirically grounded account of their experiences. Drawing on extensive research, it offers a poignant narrative that seeks to illuminate the nuanced journey these educators embark upon as they transition from teacher education spaces to the complex reality of classrooms in post-Apartheid South Africa. The book acts as a crucial platform for the voices of NQTs, shedding light on the myriad enablers and disablers they encounter during this transformative period. Timely and relevant, it tackles pressing questions about the readiness of teacher education to prepare students for the demands of South African schools. The book charts the transition from teacher education to active teacher for NQTs. The lessons distilled from this research present a clarion call for a re-assessment of teacher education policies and practices. This book arrives at a pivotal moment as South Africa reviews its teacher education policies. With the quality of initial teacher education programmes under scrutiny, the book's critiques, findings, and recommendations serve as indispensable tools for policymakers arguing for the need to reconceptualise South African teacher education policies. As South Africa strives to avoid a cycle of developing new teachers only to lose them due to inadequate support, this book seeks to support educators, policymakers, and all those invested in the future of South African education toward creating a more socially just education system recognising the highly unequal society in which teachers work.

**Shaping Tomorrow Today - SDGs from multiple perspectives** Sandra Hummel, Philipp Assinger, Christian Bauer, Thomas Brudermann, Andrea Jany, Martin Jury, Romana Rauter, Mireille van Poppel, 2023-02-02 The volume provides a unique view on multidimensional crises, their interplay, and possible resolutions for sustainable life patterns and is therefore broadly related to the Sustainable Development Goals. Traditional unidimensional and technocratic strategies often fall short. Ultimately, people, their behavior, and their habits are at the source of many problems. Therefore, it is imperative to take people, their multifaceted nature, and the necessary learning and educational processes into account when striving towards a better life for everyone.
